Platform Executive Summary

BIGGEST STRENGTH

Often placed near the top when AI ranks hotels

Among AI answers where hotel ranking could be measured, AC Hotel A Coruña appeared in the Top 3 71% of the time. This shows how prominently the hotel is positioned when AI includes it.

BIGGEST CONSTRAINT

Not appearing consistently in AI answers

The hotel appeared in at least one AI answer for 76.2% of the traveler needs we tested, but across all individual AI answers it appeared 52.8% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

CHANGE SINCE LAST COMPARABLE RUN

No comparable prior official period yet

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.

Executive Conclusion

AC Hotel A Coruña's priority is a Reality Gap in how a distinctive part of the proposition is represented in AI answers.

What the Data Is Telling Us

Scenario Presence at 76.2% shows broad recognition across monitored traveler needs. AI Consideration at 52.8% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Family Travel; Leisure Travel and Business Travel remain stronger. When the hotel is absent, NH Collection A Coruña Finisterre most often appears (7 scenarios).

Why It Matters

If distinctive property attributes are weakly represented, the hotel can look broadly visible while still losing the moments where its real proposition should matter. This is a representation problem first, not automatically a peer-competition program.

Where the Pattern Is Concentrated

Family Travel is the softest Scenario Capture at 20.0%, while Leisure Travel and Business Travel show broader coverage. The inclusion issue is concentrated, not universal. NH Collection A Coruña Finisterre appears most often when the hotel is missing (7 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 42.9% (3 of 7 attributes). Start with gaps that matter operationally — beginning with Ballroom.

What Management Should Focus On Now

Focus first on Ballroom. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change.

What to Review Next

Open Reality Gap evidence for Ballroom and compare recognition cues with official property pages and high-authority travel sources. Then check a small set of related demand scenarios for whether the attribute appears when competitors are named.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

> Family Travel is the clearest softness at 20.0% Scenario Capture. Leisure Travel and Business Travel show broader coverage — the inclusion issue is concentrated rather than universal. These are current-period levels, not trend.

DEMAND TERRITORY	SCENARIO CAPTURE	CAPTURED	CAPTURE LEVEL	INTERPRETATION
Family	20.0%	1 of 5	Low Capture	Low scenario-capture rate for this traveler need. Treat as a priority inspection area (absolute level — not a period-over-period decline).
Couples / Romantic	66.7%	6 of 9	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Adventure	66.7%	2 of 3	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Celebration	71.4%	5 of 7	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Group / Meeting	72.7%	8 of 11	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Leisure Travel	90.9%	10 of 11	High Capture	High scenario-capture rate for this traveler need in the current period.

Metric = demandCapture.byIntent scenario capture (captured/total). Prior-run territory rates are not published as a comparable series in this edition.

Competitive Movement

> NH Collection A Coruña Finisterre is the most frequent alternative when AC Hotel A Coruña is absent (7 scenarios). Meliá María Pita (6) and Attica21 Coruña (5) also appear often — displacement is spread across multiple local options. Counts show co-appearance patterns; they do not prove why displacement happens.

COMPETITOR	DISPLACEMENT COUNT
NH Collection A Coruña Finisterre	7
Meliá María Pita	6
Attica21 Coruña	5
Eurostars Atlántico	1

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.

Reality Coverage Context

> Only 3 of 7 monitored attributes are consistently recognized (42.9% Reality Coverage). Not every gap deserves equal urgency. Validate first: Ballroom; Full-Service Hotel; Business Center.

Reality Gap Prioritization

ATTRIBUTE	PRIORITY	WHY IT MATTERS OPERATIONALLY
Ballroom	Validate first	Rarely recognized today — validate source accuracy before treating as a primary fix.
Full-Service Hotel	Validate first	Rarely recognized today — validate source accuracy before treating as a primary fix.
Business Center	Validate first	Rarely recognized today — validate source accuracy before treating as a primary fix.
