Platform Executive Summary

BIGGEST STRENGTH

Often placed near the top when AI ranks hotels

Among AI answers where hotel ranking could be measured, The Westin Grand München appeared in the Top 3 80% of the time. This shows how prominently the hotel is positioned when AI includes it.

BIGGEST CONSTRAINT

Not appearing consistently in AI answers

The hotel appeared in at least one AI answer for 65.1% of the traveler needs we tested, but across all individual AI answers it appeared 49% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

CHANGE SINCE LAST COMPARABLE RUN

No comparable prior official period yet

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.

Executive Conclusion

The Westin Grand München's priority is a Reality Gap in how a distinctive part of the proposition is represented in AI answers.

What the Data Is Telling Us

Scenario Presence at 65.1% shows broad recognition across monitored traveler needs. AI Consideration at 49.0% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Adventure; Business Travel remain stronger. When the hotel is absent, The Charles Hotel most often appears (20 scenarios).

Why It Matters

If distinctive property attributes are weakly represented, the hotel can look broadly visible while still losing the moments where its real proposition should matter. This is a representation problem first, not automatically a peer-competition program.

Where the Pattern Is Concentrated

Adventure is the softest Scenario Capture at 33.3%, while Business Travel show broader coverage. The inclusion issue is concentrated, not universal. The Charles Hotel appears most often when the hotel is missing (20 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 40.0% (4 of 10 attributes). Start with gaps that matter operationally — beginning with Family-Friendly.

What Management Should Focus On Now

Focus first on Large Ballroom. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change.

What to Review Next

Open Reality Gap evidence for Large Ballroom and compare recognition cues with official property pages and high-authority travel sources. Then check a small set of related demand scenarios for whether the attribute appears when competitors are named.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

> Adventure is the clearest softness at 33.3% Scenario Capture. Business Travel show broader coverage — the inclusion issue is concentrated rather than universal. These are current-period levels, not trend.

Competitive Movement

> The Charles Hotel is the most frequent alternative when The Westin Grand München is absent (20 scenarios). Hotel Vier Jahreszeiten Kempinski München (16) and Hotel Bayerischer Hof (15) also appear often — displacement is spread across multiple local options. Counts show co-appearance patterns; they do not prove why displacement happens.

COMPETITOR	DISPLACEMENT COUNT
The Charles Hotel	20
Hotel Vier Jahreszeiten Kempinski München	16
Hotel Bayerischer Hof	15
Mandarin Oriental Munich	15
Sofitel Munich Bayerpost	11

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.

Reality Coverage Context

> Only 4 of 10 monitored attributes are consistently recognized (40.0% Reality Coverage). Not every gap deserves equal urgency. Actionable now: Family-Friendly. Directly overlaps family-oriented representation — closing this supports inclusion in the softest traveler-need context. Validate first: Wellness Positioning; Large Ballroom.
