

Brand AI Intelligence

How your brands appear when hotel owners ask AI about development, conversion, and positioning — tracked by geography and provider with governed evidence.

DISCLAIMER

- AI model outputs are probabilistic and may vary between monitoring runs.
- Dealality validates calculation accuracy, evidence traceability, and monitoring consistency.
- Interpret AI answers as observed model behavior—not guaranteed fact or advice. Results are calculated from monitored runs using consistent rules.

Executive Summary

Key takeaways from the current monitoring period—what changed, where you stand, and why it matters.

LARGEST COMPETITIVE STRENGTH

In CALA, Autograph Collection leads this portfolio at 91.7% Presence. Owners asking AI for brand options are more likely to see it first. That is the current competitive strength.

Evidence: Highest portfolio Presence · CALA · 91.7%

LARGEST COMPETITIVE GAP

In 10 conversion checks across 4 providers, AC Hotels is often missing. Autograph Collection, Tribute Portfolio and 2 peers appear more. That lowers visibility when owners build conversion shortlists.

Evidence: Repeated across 4 providers · 10 observations

PROVIDER COMPARISON

In the same CALA cohort, Presence is 91.7% on OpenAI and 58.3% on Perplexity. The 33.4-point gap shows strong visibility on one provider does not carry to others.

Evidence: OpenAI 91.7% vs Perplexity 58.3% · Same comparable prompt cohort

POTENTIAL AI PERCEPTION GAP

One AI response treats Westin like a soft brand. Governed records classify Westin as Hard Brand. This is one response, so the signal is early. It can still affect how owners judge brand fit.

Evidence: Early signal · 1 observation · Governed classification: Hard Brand

OBSERVED AI ASSOCIATION

In 48 owner-decision checks across 3 providers, Design Hotels is linked to distribution. This is a stable positive signal. It supports monitoring more than corrective action.

Evidence: Repeated across 3 providers · 48 qualifying association observations

Portfolio Snapshot

Factual indicators for your entitled brands in the selected geography — no composite score.

PORTFOLIO AI PRESENCE

91.7%

Share of monitored owner questions where at least one of your linked brands appeared.

BRANDS MONITORED

5 of 5

How many of your linked brands are included in monitoring here.

STRONGEST BRAND

Autograph Collection

Entitled brand with the highest Observed Presence in this geography.

BEST COMPETITIVE POSITION

Autograph Collection — #1 of 15

Your brand with the best peer rank in this geography.

QUESTIONS MISSING

8.3% (1)

Monitored owner questions where the brand was not observed in the answer.

Prompt Intelligence · Observed demand · Expert scenarios

We use both observed demand and expert scenario intelligence. Observed demand reflects externally measured query themes. Scenario intelligence tests commercially important owner and developer decisions that may not appear as literal high-volume searches.
