AI VISIBILITY AUDIT & ACTION PLAN

Fiesta Americana Condesa Cancún All Inclusive

Cancún, Quintana Roo

INITIAL DIGITAL PRESENCE ASSESSMENT

NOVEMBER 2026

1. Executive Audit Summary

Protect the Peer Lead While Improving Absolute Buyer Recognition

Fiesta Americana Condesa Cancún All Inclusive ranks first among four certified Fiesta Americana all-inclusive resort peers, yet absolute consideration is 2.8% and scenario presence is 11.1%. That combination is not evidence of a defect. The hotel already has recognized all-inclusive, beachfront, and spa strengths; the practical opportunity is to present under-recognized fitness, watersports, and romance attributes more clearly, while correcting public dining-count inconsistency and protecting the conditions attached to the airport-transfer offer.

Performance Snapshot

AI CONSIDERATION	SCENARIO PRESENCE	CERTIFIED PEER POSITION
2.8%	**11.1%**	**#1 of 4**
Mentioned in 5 of 180 comparable monitored AI answers	Present across 5 of 45 eligible traveler-need scenarios	Highest presence among 4 certified Fiesta Americana all-inclusive resort peers

AI Consideration is based on 5 of 180 comparable monitored answers; Scenario Presence is based on 5 of 45 eligible scenarios. Certified Peer Position compares the four-hotel Fiesta Americana all-inclusive resort set. These measures do not represent bookings, revenue, or traveler exposure.

Key Findings

1. Peer Leadership Does Not Equal Broad Consideration

The resort is #1 of 4 in its certified peer set but appears in a small share of the broader monitored answers and scenarios.
Why it matters. The hotel can build on a relative strength while treating low absolute presence as a prioritization signal rather than a diagnosed website failure.

2. Dining Inventory Needs One Count Language

The official amenities page says 10 restaurants and bars, while Booking.com displays 15 restaurants.
Why it matters. The difference may reflect whether bars, counters, or seasonal outlets are counted. Guests and partners need one approved classification.

3. Offer Conditions and Selective Differentiators Need Clarity

Free airport transfer requires an official-site booking of at least four nights, while fitness, watersports, and honeymoon recognition remain partial.
Why it matters. Clear conditions prevent over-promising, and selective content can improve decision context without inventing defects or guaranteeing demand.

Recommended Priorities

PRIORITY	ACTION	DESIRED OUTCOME
High	Commercial team: strengthen verified differentiators	Clearer fitness, watersports, family, spa, and beachfront context
High	Food and beverage: align official and Booking.com outlet counts	One approved dining inventory
High	Revenue and digital: make airport-transfer conditions consistent	Accurate eligibility language across booking paths
Optional	Leadership: decide whether romance content supports target demand	Documented wedding/honeymoon go or no-go

EXECUTIVE TAKEAWAY

The resort's first-place peer rank is a sound foundation, not a reason to overstate performance. The best next step is disciplined information quality—align dining counts, protect offer conditions, and selectively strengthen real differentiators—then evaluate future movement through governed measurement. Digital authority: The resort's strongest verified digital surfaces today are brand and major leisure-distribution pages.

5. Digital Authority & AI Citation Opportunities

PARTIAL_PUBLIC_SEARCH — no paid backlink inventory.

> **EXECUTIVE FINDING**
> Leisure distribution and brand pages are the strongest verified surfaces. Turismo Cancún content reviewed did not confirm a hotel-specific lodging fiche with an outbound backlink. Booking.com was retained as a verified leisure-distributor mention surface (not a destination-authority backlink). Closing an official Cancún tourism lodging inclusion remains the top authority opportunity.

No third-party hyperlinks to the official hotel website were confirmed in this public-partial pass. Mentions without hyperlinks are classified separately.

Competitive comparison

Peers are other Fiesta Americana all-inclusives outside Cancún Hotel Zone—destination authority work should focus on Cancún inventories, not cross-destination brand pages. No verified competitor Hotel Zone website-backlink advantage was proven in this unpaid pass.

- **Cancún official tourism lodging inventories** — turismocancun.mx content reviewed; hotel-specific Condesa lodging listing with outbound backlink not confirmed. Not labeled CONFIRMED_SUBJECT_ABSENCE without a full inventory review. Evidence

HIGH PRIORITY | NOT STARTED | NEEDS INVESTIGATION | Owner: Hotel Commercial Leadership

ACTION 03 · AVA-FACC-003

Standardize Free Airport Transfer Conditions

HIGH PRIORITY | NOT STARTED | NEEDS HOTEL CONFIRMATION | Owner: Revenue / Reservations Leadership

Timing: Review in 2 weeks; approved updates within 30 days

WHAT WE FOUND

Official pages state that transfer requires booking on the brand website for at least four nights; the offer page adds round-trip, package, and flight-information conditions.

1. Revenue and reservations approve the complete current rule set.
2. Place a concise eligibility line beside every transfer headline.
3. Link property and amenities pages to the full offer terms.
4. QA booking confirmation, FAQ, call-center scripts, and partner descriptions.

ACTION 04 · AVA-FACC-004

Decide Whether to Expand Romance and Honeymoon Content

OPTIONAL | NOT STARTED | OPTIONAL OPPORTUNITY | Owner: Hotel Commercial Leadership

Timing: Decision within 30 days; content in 60–90 days if approved

WHAT WE FOUND

ADP honeymoon recognition was 15.4%, and public guest context indicates couple interest. This does not establish a missing-page defect.

WHY IT MATTERS

A focused romance module could clarify fit and inquiry routing, but generic content would add maintenance and cannot guarantee leads or bookings.

RECOMMENDED ACTION

1. Commercial leadership records a wedding/honeymoon go or no-go.
2. If go, define target occasions, packages, adult-versus-family positioning, proof points, and inquiry owner.
3. Draft concise content without weakening the family-resort proposition.
4. If no-go, document and close the action.

VERIFICATION METHOD

DEPENDENCIES

TECHNICAL NOTES

Not an observed AI citation. No paid SEO tool used. Bot-restricted package-operator URLs omitted from customer-facing evidence.

7. Methodology, Responsibilities & Next Steps

Combines the certified ADP baseline with a bounded review of named official and public partner pages. No paid research, ADP remeasurement, production write, or customer publication was performed.

How to Read Findings

- VERIFIED_ISSUE — a directly observed, source-backed discrepancy.
- RECOMMENDED_INVESTIGATION — evidence warrants review but does not prove a defect or cause.
- REQUIRES_HOTEL_CONFIRMATION — leadership must establish the source of truth before correction.
- OPTIONAL_COMMERCIAL_OPPORTUNITY — proceed only if leadership wants the demand.

Responsibilities

- Hotel leadership confirms facts, priorities, offer rules, and public changes.
- Digital, operations, revenue, and partner teams implement only approved corrections and document verification.

- Dealality packages measurement context and evidence without implying ranking, booking, or revenue causation.

How This Relates to Monthly Monitoring

Approved actions may be tracked later. Completing an action does not itself prove a change in AI presence, bookings, or revenue.

Suggested Next Step

Approve the dining roster and transfer terms, then authorize the highest-priority validated work.
