Executive Conclusion

Faranda Collection Bogotá's primary issue is entering AI consideration at all, especially for Couples / Romantic Stay.

What the Data Is Telling Us

AI Consideration is 20.7%, so the hotel appears in only a limited share of individual comparable responses. When the hotel is absent, Four Seasons Hotel Bogotá repeatedly appears instead — a concentrated substitution pattern rather than a diffuse competitor list. Rank tactics have limited value until relevance improves. The primary constraint is becoming part of the answer set for the traveler needs the hotel currently misses. Softest Scenario Capture is Couples / Romantic at 12.5%. Four Seasons Hotel Bogotá most often appears when the hotel is missing (40 scenarios).

Why It Matters

Fine-tuning rank against individual competitors will have limited value until the hotel becomes relevant in more of the traveler needs it currently misses. Entry problems and rank problems require different management attention. If leadership optimizes competitor comparisons first, the hotel can look busy while still missing the larger answer-set gap.

Where the Pattern Is Concentrated

Couples / Romantic is the softest Scenario Capture at 12.5%. Focus where the gap is concentrated rather than treating every territory equally. Four Seasons Hotel Bogotá appears most often when the hotel is missing (40 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 36.4% (4 of 11 attributes). Start with gaps that matter operationally — beginning with Business District Location.

What Management Should Focus On Now

Focus first on how the hotel is represented for Couples / Romantic Stay. Review whether the attributes, positioning, and use cases most relevant to those travelers are complete and consistently represented across priority sources. Treat competitor-rank tactics as secondary until entry improves.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change.

What to Review Next

Compare evidence from scenarios where Four Seasons Hotel Bogotá appears with the property information currently available for Faranda Collection Bogotá. Check entry cues first — product type, occasion, and location framing — before broadening the review to secondary attributes.

Competitive Movement

Four Seasons Hotel Bogotá is the most frequent alternative when Faranda Collection Bogotá is absent (40 scenarios). Click Clack Hotel Bogotá (30) and JW Marriott Hotel Bogotá (29) also appear often — displacement is spread across multiple local options. Counts show co-appearance patterns; they do not prove why displacement happens.

COMPETITOR	DISPLACEMENT COUNT
Four Seasons Hotel Bogotá	40
Click Clack Hotel Bogotá	30
JW Marriott Hotel Bogotá	29
Hotel Casa Dann Carlton	25
Hotel Estelar La Fontana	14

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.
