Executive Assessment

Executive Conclusion — Waterstone Resort & Marina's priority is a Reality Gap in how a distinctive part of the proposition is represented in AI answers. Why this is the primary issue — Outdoor Event Space is recognized in only 9.4% of monitored answers. That is low enough to matter commercially if the attribute is part of how the hotel should win relevant traveler needs. Eau Palm Beach Resort & Spa also appears in related absent scenarios, which can compound the representation miss. Broader Scenario Presence (73.1%) and Consideration (51.3%) do not, by themselves, prove the distinctive attribute is traveling into answers. If distinctive property attributes are weakly represented, the hotel can look broadly visible while still losing the moments where its real proposition should matter. This is a representation problem first, not automatically a peer-competition program. Where the pattern is concentrated — Scenario Capture is softest in Wellness (50.0%) versus stronger Business Travel (91.7%). These are current-period scenario-capture rates from demandCapture.byIntent — not answer-level consideration. When the property is absent, the leading observed alternative is Eau Palm Beach Resort & Spa (15 monitored scenarios). Counts are observational and do not establish causation. Reality Coverage is 38.9% (7 of 18 monitored attributes recognized). High-severity gaps include 24-Hour Fitness Center; Pet-Friendly; EV Charging. What management should focus on — Focus first on Outdoor Event Space. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it. What not to overreact to — No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown. Independent Positioning shows #4 of 6 with Portfolio AI Presence 50.0%. Portfolio and Core metrics share observation context but are not interchangeable denominators. What to watch next — Open Reality Gap evidence for Outdoor Event Space and compare recognition cues with official property pages and high-authority travel sources. Then check a small set of related demand scenarios for whether the attribute appears when competitors are named. Anchored metrics (current published ADP): AI Consideration 51.3%; Scenario Presence 73.1%; Reality Coverage 38.9%. Biggest Strength (platform): Strong visibility for Couples / Romantic Stay. Biggest Constraint (platform): Not appearing consistently in AI answers.

POSITIVE SIGNAL

For Couples / Romantic Stay searches, Waterstone Resort & Marina appeared in 72.2% of AI answers, compared with 12.3% for the comparable hotels used in this analysis. That means the hotel was surfaced about 5.9 times as often as the comparable hotels used in this analysis. In practical terms, this is the area where the hotel is showing its clearest visibility advantage versus similar hotels.

WATCH ITEM

The hotel appeared in at least one AI answer for 73.1% of the traveler needs we tested, but across all individual AI answers it appeared 51.3% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

MANAGEMENT PRIORITY

Focus first on Outdoor Event Space. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it.
