Platform Executive Summary

BIGGEST STRENGTH Strong visibility for Couples / Romantic Stay For Couples / Romantic Stay searches, Waterstone Resort & Marina appeared in 72.2% of AI answers, compared with 12.3% for the comparable hotels used in this analysis. That means the hotel was surfaced about 5.9 times as often as the comparable hotels used in this analysis. In practical terms, this is the area where the hotel is showing its clearest visibility advantage versus similar hotels.	BIGGEST CONSTRAINT Not appearing consistently in AI answers The hotel appeared in at least one AI answer for 73.1% of the traveler needs we tested, but across all individual AI answers it appeared 51.3% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced. Executive Conclusion

Waterstone Resort & Marina's priority is a Reality Gap in how a distinctive part of the proposition is represented in AI answers.

What the Data Is Telling Us

Outdoor Event Space is recognized in only 9.4% of monitored answers. That is low enough to matter commercially if the attribute is part of how the hotel should win relevant traveler needs. Eau Palm Beach Resort & Spa also appears in related absent scenarios, which can compound the representation miss. Broader Scenario Presence (73.1%) and Consideration (51.3%) do not, by themselves, prove the distinctive attribute is traveling into answers.

Why It Matters

If distinctive property attributes are weakly represented, the hotel can look broadly visible while still losing the moments where its real proposition should matter. This is a representation problem first, not automatically a peer-competition program.

Where the Pattern Is Concentrated

Wellness shows the softest Scenario Capture (50.0%), while Business Travel remains stronger (91.7%). That contrast supports a concentrated softness reading — not a uniform demand failure. Eau Palm Beach Resort & Spa most often appears when the hotel is absent (15 scenarios) — useful for source and fact reconciliation, not as proof of cause. Reality Coverage is 38.9% (7/18 attributes). Material gaps include 24-Hour Fitness Center; Pet-Friendly; EV Charging.

What Management Should Focus On Now

Focus first on Outdoor Event Space. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it.

What Not to Overreact To

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown. Independent Positioning (#4 of 6; Portfolio AI Presence 50.0%) uses a different denominator than Core consideration — treat it as relative portfolio context, not a second Core score.

What to Review Next

Open Reality Gap evidence for Outdoor Event Space and compare recognition cues with official property pages and high-authority travel sources. Then check a small set of related demand scenarios for whether the attribute appears when competitors are named.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

Wellness is the clearest current-period softness at 50.0% Scenario Capture. Business Travel shows broader scenario coverage, suggesting the inclusion problem is concentrated rather than universal. These are absolute current-period levels — not period-over-period movement.

Metric = demandCapture.byIntent scenario capture (captured/total). Prior-run territory rates are not published as a comparable series in this edition.

Competitive Movement

Eau Palm Beach Resort & Spa is the most frequently observed alternative when Waterstone Resort & Marina is absent, appearing in 15 displaced scenarios. Four Seasons Resort Palm Beach (12) and The Boca Raton (10) also appear frequently, indicating displacement is spread across multiple local alternatives rather than a single rival. Counts are observational and do not establish why displacement occurs.

COMPETITOR	DISPLACEMENT COUNT
Eau Palm Beach Resort & Spa	15
Four Seasons Resort Palm Beach	12
The Boca Raton	10
Pelican Grand Beach Resort	6
Cheeca Lodge & Spa	5

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.

Independent Positioning Context

Within the Independent Positioning peer set, the hotel ranks #4 of 6 while Portfolio AI Presence is 50.0%. That portfolio presence level is directionally consistent with Core AI Consideration — relative standing inside the loyalty set can look strong even while absolute answer-level inclusion remains the binding constraint.

Reality Coverage Context

Only 7 of 18 monitored property attributes are consistently recognized (38.9% Reality Coverage). Highest-severity gaps today include 24-Hour Fitness Center; Pet-Friendly; EV Charging. Prioritize attributes that overlap with weak traveler-need scenarios or displacement evidence — not every gap is equally material.
