This shows how prominently the hotel is positioned when AI includes it.	BIGGEST CONSTRAINT Not appearing consistently in AI answers The hotel appeared in at least one AI answer for 81% of the traveler needs we tested, but across all individual AI answers it appeared 42.1% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced. Executive Conclusion

Bethesda Marriott reaches many monitored demand scenarios, but consideration consistency is the primary constraint.

What the Data Is Telling Us

Scenario Presence at 81.0% shows broad recognition across monitored traveler needs. AI Consideration at 42.1% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Family Travel; Business Travel, Leisure Travel, and Group / Meeting remain stronger. When the hotel is absent, Hyatt Regency Bethesda most often appears (11 scenarios).

Why It Matters

Bethesda Marriott is already understood as a relevant hotel across a broad share of monitored demand. The opportunity is to make that relevance translate more consistently into answer inclusion — especially in weaker traveler-need contexts — rather than rebuilding awareness or assuming a new competitive set is required.

Where the Pattern Is Concentrated

Family Travel is the softest Scenario Capture at 40.0%, while Business Travel, Leisure Travel, and Group / Meeting show broader coverage. The inclusion issue is concentrated, not universal. Hyatt Regency Bethesda appears most often when the hotel is missing (11 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 26.7% (4 of 15 attributes). Start with gaps that matter operationally — beginning with Montgomery County Location.

What Management Should Focus On Now

Focus first on consistency of representation for Family Travel. Confirm priority sources present the same use cases and attributes that appear in scenarios where the hotel is absent, and close gaps that repeatedly coincide with answer-level misses.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change. Independent Positioning (#1 of 4; Portfolio AI Presence 42.1%) measures relative standing among loyalty peers. Strong peer rank does not mean consistent inclusion across the wider demand set.

What to Review Next

Compare high-presence versus low-consideration scenarios and inspect which sources and attributes appear when the hotel is missing. Use that evidence pack before changing channel strategy.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

Family Travel is the clearest softness at 40.0% Scenario Capture. Business Travel, Leisure Travel, and Group / Meeting show broader coverage — the inclusion issue is concentrated rather than universal. These are current-period levels, not trend.

DEMAND TERRITORY	SCENARIO CAPTURE	CAPTURED	CAPTURE LEVEL	INTERPRETATION
Family	40.0%	2 of 5	Low Capture	Low scenario-capture rate for this traveler need. Treat as a priority inspection area (absolute level — not a period-over-period decline).
Couples / Romantic	55.6%	5 of 9	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Business Travel	85.7%	12 of 14	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Celebration	85.7%	6 of 7	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Leisure Travel	90.9%	10 of 11	High Capture	High scenario-capture rate for this traveler need in the current period.
Group / Meeting	90.9%	10 of 11	High Capture	High scenario-capture rate for this traveler need in the current period.

Metric = demandCapture.byIntent scenario capture (captured/total). Prior-run territory rates are not published as a comparable series in this edition.

Competitive Movement

Hyatt Regency Bethesda is the most frequent alternative when Bethesda Marriott is absent (11 scenarios). Marriott Bethesda Downtown at Marriott HQ (9) and The Bethesdan Hotel, Tapestry Collection by Hilton (8) also appear often — displacement spans both same-brand and broader local options. Counts show co-appearance patterns; they do not prove why displacement happens.

COMPETITOR	DISPLACEMENT COUNT
Hyatt Regency Bethesda	11
Marriott Bethesda Downtown at Marriott HQ	9
The Bethesdan Hotel, Tapestry Collection by Hilton	8
AC Hotel Bethesda Downtown	5
Hilton Garden Inn Bethesda Downtown	5

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.

Independent Positioning Context

Among loyalty peers in the Independent Positioning set, the hotel ranks #1 of 4. Portfolio AI Presence is 42.1% — aligned with Core AI Consideration. Relative strength inside the loyalty set can coexist with inconsistent inclusion in the broader answer set; peer rank is not a substitute for market-wide selection consistency.

Reality Coverage Context

Only 4 of 15 monitored attributes are consistently recognized (26.7% Reality Coverage). Not every gap deserves equal urgency. Actionable now: Montgomery County Location; 24-Hour Fitness Center — Location identity is foundational for traveler recognition and often overlaps weaker local-demand scenarios. Monitor: Peloton Fitness.

Reality Gap Prioritization

ATTRIBUTE	PRIORITY	WHY IT MATTERS OPERATIONALLY
Montgomery County Location	Actionable now	Location identity is foundational for traveler recognition and often overlaps weaker local-demand scenarios.
24-Hour Fitness Center	Actionable now	Overlaps the softest traveler-need context; closing representation here supports inclusion consistency.
Peloton Fitness	Monitor	Narrow amenity signal; monitor unless evidence shows it coincides with repeated absences.
