Platform Executive Summary

BIGGEST STRENGTH Often placed near the top when AI ranks hotels Among AI answers where hotel ranking could be measured, Bethesda Marriott appeared in the Top 3 63.3% of the time. This shows how prominently the hotel is positioned when AI includes it.	BIGGEST CONSTRAINT Not appearing consistently in AI answers The hotel appeared in at least one AI answer for 76.2% of the traveler needs we tested, but across all individual AI answers it appeared 42.9% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced. Executive Conclusion

Bethesda Marriott reaches many monitored demand scenarios, but consideration consistency is the primary constraint.

What the Data Is Telling Us

Scenario Presence at 76.2% shows broad recognition across monitored traveler needs. AI Consideration at 42.9% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Adventure; Celebration and Wellness remain stronger. When the hotel is absent, Hyatt Regency Bethesda most often appears (14 scenarios).

Why It Matters

Broad scenario reach without consistent appearance in AI answers means the hotel is known in the demand set but not reliably carried into traveler-facing answers. Management attention should start with consistency of representation, not with assuming the hotel needs an entirely new competitive set.

Where the Pattern Is Concentrated

Adventure is the softest Scenario Capture at 50.0%, while Celebration and Wellness show broader coverage. The inclusion issue is concentrated, not universal. Hyatt Regency Bethesda appears most often when the hotel is missing (14 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 20.0% (3 of 15 attributes). Start with gaps that matter operationally — beginning with 24-Hour Fitness Center.

What Management Should Focus On Now

Focus first on consistency of representation for Family Travel. Confirm priority sources present the same use cases and attributes that appear in scenarios where the hotel is absent, and close gaps that repeatedly coincide with cases where the hotel is missing.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change. Independent Positioning (#1 of 4; Portfolio AI Presence 42.1%) measures relative standing among loyalty peers. Strong peer rank does not mean consistent inclusion across the wider demand set.

What to Review Next

Compare high-presence versus low-consideration scenarios and inspect which sources and attributes appear when the hotel is missing. Use that evidence pack before changing channel strategy.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

Adventure is the clearest softness at 50.0% Scenario Capture. Celebration and Wellness show broader coverage — the inclusion issue is concentrated rather than universal. These are current-period levels, not trend.

Metric = demandCapture.byIntent scenario capture (captured/total). Prior-run territory rates are not published as a comparable series in this edition.

Competitive Movement

Hyatt Regency Bethesda is the most frequent alternative when Bethesda Marriott is absent (14 scenarios). The Bethesdan Hotel, Tapestry Collection by Hilton (13) and Marriott Bethesda Downtown at Marriott HQ (11) also appear often — displacement spans both same-brand and broader local options. Counts show co-appearance patterns; they do not prove why displacement happens.

COMPETITOR	DISPLACEMENT COUNT
Hyatt Regency Bethesda	14
The Bethesdan Hotel, Tapestry Collection by Hilton	13
Marriott Bethesda Downtown at Marriott HQ	11
AC Hotel Bethesda Downtown	9
Bethesda North Marriott Hotel & Conference Center	6

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.

Independent Positioning Context

Among loyalty peers in the Independent Positioning set, the hotel ranks #1 of 4. Portfolio AI Presence is 42.1% — aligned with Core AI Consideration. Relative strength inside the loyalty set can coexist with inconsistent inclusion in the broader answer set; peer rank is not a substitute for market-wide selection consistency.

Reality Coverage Context

Only 3 of 15 monitored attributes are consistently recognized (20.0% Reality Coverage). Not every gap deserves equal urgency. Validate first: 24-Hour Fitness Center.

Reality Gap Prioritization

ATTRIBUTE	PRIORITY	WHY IT MATTERS OPERATIONALLY
24-Hour Fitness Center	Validate first	High-severity amenity gap — confirm whether public sources already state the amenity clearly before investing in content changes.

- 4. Correct only the sources where facts are missing, conflicting, or outdated. Do not change measurement methodology.
