Executive Conclusion

Cambridge Beaches Resort & Spa shows unusual strength in parts of the monitored set, but that strength can hide concentrated soft spots.

What the Data Is Telling Us

Peer-relative Presence Index reaches 1118, while overall Consideration is 71.3%. That combination can look like a simple success story if leadership stops at the headline strength. The St. Regis Bermuda Resort still displaces the hotel in specific contexts. The executive value is in the concentrated contrast, not in restating strength alone.

Why It Matters

The issue is concentrated, not broad. Leadership needs to understand where strength does not travel — otherwise attention may stay on strengths that already work while missing the soft spots that still affect commercially relevant demand contexts.

Where the Pattern Is Concentrated

Business Travel shows the softest Scenario Capture (83.3%), while Adventure remains stronger (100.0%). That contrast supports a concentrated softness reading — not a uniform demand failure. The St. Regis Bermuda Resort most often appears when the hotel is absent (3 scenarios) — useful for source and fact reconciliation, not as proof of cause. Reality Coverage is 44.4% (8/18 attributes). Material gaps include All-Inclusive Option; Island Resort.

What Management Should Focus On Now

Focus first on the contexts where The St. Regis Bermuda Resort is surfaced instead of Cambridge Beaches Resort & Spa. Keep existing strength in view while closing this concentrated soft spot, and avoid turning a residual gap into a full repositioning exercise.

What Not to Overreact To

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown. Independent Positioning (#1 of 4; Portfolio AI Presence 81.3%) uses a different denominator than Core consideration — treat it as relative portfolio context, not a second Core score.

What to Review Next

Open displacement evidence for The St. Regis Bermuda Resort and compare cited attributes with Cambridge Beaches Resort & Spa's source representation. Then review the strongest territory evidence to keep the residual work proportional.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Group / Meeting, Celebration, and Leisure Travel show broader scenario coverage, suggesting the inclusion problem is concentrated rather than universal. Competitive Movement

The Reefs Resort & Club (2) and Newstead Belmont Hills Golf Resort & Spa (1) also appear frequently, indicating displacement is spread across multiple local alternatives rather than a single rival. Counts are observational and do not establish why displacement occurs.

Reality Coverage Context
