Executive Conclusion

Hotel Phillips Kansas City, Curio Collection by Hilton reaches many monitored demand scenarios, but consideration consistency is the primary constraint.

What the Data Is Telling Us

Scenario Presence at 73.0% shows broad recognition across monitored traveler needs. AI Consideration at 31.3% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Group / Meeting; Couples / Romantic remain stronger. When the hotel is absent, Loews Kansas City Hotel most often appears (12 scenarios).

Why It Matters

Broad scenario reach without consistent appearance in AI answers means the hotel is known in the demand set but not reliably carried into traveler-facing answers. Management attention should start with consistency of representation, not with assuming the hotel needs an entirely new competitive set.

Where the Pattern Is Concentrated

Group / Meeting is the softest Scenario Capture at 63.6%, while Couples / Romantic show broader coverage. The inclusion issue is concentrated, not universal. Loews Kansas City Hotel appears most often when the hotel is missing (12 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 33.3% (3 of 9 attributes). Start with gaps that matter operationally — beginning with Fitness Center.

What Management Should Focus On Now

Focus first on consistency of representation for Wellness. Confirm priority sources present the same use cases and attributes that appear in scenarios where the hotel is absent, and close gaps that repeatedly coincide with cases where the hotel is missing.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change.

What to Review Next

Compare high-presence versus low-consideration scenarios and inspect which sources and attributes appear when the hotel is missing. Use that evidence pack before changing channel strategy.
