

AI DEMAND PERFORMANCE REVIEW

JW Marriott Hotel Santo Domingo

Distrito Nacional

MONTHLY EXECUTIVE REVIEW

SEPTEMBER 2026 · CURRENT MONITORING SEP 8, 2026 · PRIOR RUN —
PERFORMANCE · COMPETITIVE MOVEMENT · EVIDENCE · ACTIONS · ACCOUNTABILITY

This AI Demand Performance Review is a Dealality executive monitoring report. Measurement methodology is unchanged by presentation.
Confidential — for the named recipient only.

1. Executive Performance

No official comparable prior period is available. This review is a current-period baseline read; prior-run trend deltas are not shown.

AI CONSIDERATION 71.4% COMPETITIVE POSITION Crowne Plaza Santo Domingo Top displacement competitor · 1 scenarios where subject was absent	SCENARIO PRESENCE 98.4% BRAND PORTFOLIO POSITION 71.4% 180 of 252 AI observations	REALITY COVERAGE 61.5% PORTFOLIO RANK #1 of 4 Among 4 relevant Marriott Bonvoy hotels
--	--	--

Platform Executive Summary

BIGGEST STRENGTH Often placed near the top when AI ranks hotels Among AI answers where hotel ranking could be measured, JW Marriott Hotel Santo Domingo appeared in the Top 3 89.6% of the time. This shows how prominently the hotel is positioned when AI includes it.	BIGGEST CONSTRAINT Not appearing consistently in AI answers The hotel appeared in at least one AI answer for 98.4% of the traveler needs we tested, but across all individual AI answers it appeared 71.4% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.	CHANGE SINCE LAST COMPARABLE RUN No comparable prior official period yet No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.
---	---	--

Executive Conclusion

JW Marriott Hotel Santo Domingo's priority is a Reality Gap in how a distinctive part of the proposition is represented in AI answers.

What the Data Is Telling Us

Urban Luxury is recognized in only 0.6% of monitored answers. That is low enough to matter commercially if the attribute is part of how the hotel should win relevant traveler needs. Crowne Plaza Santo Domingo also appears in related absent scenarios, which can compound the representation miss. Broader Scenario Presence (98.4%) and Consideration (71.4%) do not, by themselves, prove the distinctive attribute is traveling into answers.

Why It Matters

If distinctive property attributes are weakly represented, the hotel can look broadly visible while still losing the moments where its real proposition should matter. This is a representation problem first, not automatically a peer-competition program.

Where the Pattern Is Concentrated

Wellness shows the softest Scenario Capture (75.0%), while Adventure remains stronger (100.0%). That contrast supports a concentrated softness reading — not a uniform demand failure. Crowne Plaza Santo Domingo most often appears when the hotel is absent (1 scenarios) — useful for source and fact reconciliation, not as proof of cause. Reality Coverage is 61.5% (8/13 attributes). Material gaps include Urban Luxury.

What Management Should Focus On Now

Focus first on Urban Luxury. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it.

What Not to Overreact To

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown. Independent Positioning (#1 of 4; Portfolio AI Presence 71.4%) uses a different denominator than Core consideration — treat it as relative portfolio context, not a second Core score.

What to Review Next

Open Reality Gap evidence for Urban Luxury and compare recognition cues with official property pages and high-authority travel sources. Then check a small set of related demand scenarios for whether the attribute appears when competitors are named.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

Wellness is the clearest current-period softness at 75.0% Scenario Capture. Business Travel, Leisure Travel, and Couples / Romantic show broader scenario coverage, suggesting the inclusion problem is concentrated rather than universal. These are absolute current-period levels — not period-over-period movement.

DEMAND TERRITORY	SCENARIO CAPTURE	CAPTURED	CAPTURE LEVEL	INTERPRETATION
Wellness	75.0%	3 of 4	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Business Travel	100.0%	13 of 13	High Capture	High scenario-capture rate for this traveler need in the current period.
Leisure Travel	100.0%	11 of 11	High Capture	High scenario-capture rate for this traveler need in the current period.
Couples / Romantic	100.0%	9 of 9	High Capture	High scenario-capture rate for this traveler need in the current period.
Group / Meeting	100.0%	11 of 11	High Capture	High scenario-capture rate for this traveler need in the current period.
Family	100.0%	5 of 5	High Capture	High scenario-capture rate for this traveler need in the current period.

Metric = demandCapture.byIntent scenario capture (captured/total). Prior-run territory rates are not published as a comparable series in this edition.

Competitive Movement

Crowne Plaza Santo Domingo is the most frequently observed alternative when JW Marriott Hotel Santo Domingo is absent, appearing in 1 displaced scenarios. El Embajador, a Royal Hideaway Hotel (1) and Hilton Santo Domingo (1) also appear frequently, indicating displacement is spread across multiple local alternatives rather than a single rival. Counts are observational and do not establish why displacement occurs.

COMPETITOR	DISPLACEMENT COUNT
Crowne Plaza Santo Domingo	1
El Embajador, a Royal Hideaway Hotel	1
Hilton Santo Domingo	1
InterContinental Real Santo Domingo	1
Kimpton Las Mercedes	1

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.

Independent Positioning Context

Within the Independent Positioning peer set, the hotel ranks #1 of 4 while Portfolio AI Presence is 71.4%. That portfolio presence level is directionally consistent with Core AI Consideration — relative standing inside the loyalty set can look strong even while absolute answer-level inclusion remains the binding constraint.

Reality Coverage Context

Only 8 of 13 monitored property attributes are consistently recognized (61.5% Reality Coverage). Highest-severity gaps today include Urban Luxury. Prioritize attributes that overlap with weak traveler-need scenarios or displacement evidence — not every gap is equally material.

3. Evidence Review

EVIDENCE 01

Business

Provider: Claude

Observation: # Best Luxury Hotels in Piantini, Santo Domingo for Business ## 🏆 Top Recommendations ### 1. **Hotel Catalonia Santo Domingo** ⭐⭐⭐⭐⭐ - Located in the heart of Piantini - Full business center & meeting rooms - Rooftop pool & restaurant - Strong WiFi & corporate amenities ### 2. **Meliá Santo Domingo** ⭐⭐⭐⭐⭐ - Excellent business facilities - Conference rooms & event spaces - Close to financial district - Internationa...

Why It Matters: Shows a monitored case where the property was not mentioned while alternatives were surfaced.

Management Review: Review whether property information for this traveler need is complete and consistently represented across first-party and major third-party sources.

EVIDENCE 02

Scenarios where subject is absent

Provider: Cross-provider

Observation: Crowne Plaza Santo Domingo appeared in 1 monitored scenarios where JW Marriott Hotel Santo Domingo was absent.

Why It Matters: Identifies the competitor most often present when the subject hotel is missing from AI answers.

Management Review: Compare public positioning and third-party descriptions against this competitor for the traveler needs where displacement concentrates.

EVIDENCE 03

Property reality attributes

Provider: All Providers

Observation: Urban Luxury recognized in 0.6% of applicable monitored answers (1 of 180).

Why It Matters: This attribute is part of the monitored property proposition but is infrequently reflected in AI answers.

Management Review: Verify whether "Urban Luxury" is accurately and consistently described on the hotel website and major booking/travel platforms.

4. Management Action Agenda

ACTION 01

Stand up a TripAdvisor management-response program with owner, SLA, and theme tracking

HIGH **OPEN** Owner: Guest Experience / Reputation Owner Due: Date to be confirmed

OBSERVED ISSUE

TripAdvisor appears in 67.2% of cited sources in the current monitoring period (43 citations), making response quality and factual corrections operationally material when misconceptions appear.

RECOMMENDED ACTION — IMPLEMENTATION STEPS

1. Confirm the hotel’s canonical facts for TripAdvisor responses with the accountable owner (JW Marriott Hotel Santo Domingo).
2. Complete the applicable checklist items: designate accountable owner; set response SLA (property-configured; do not invent a default unless governed); identify recurring complaint themes monthly; correct factual misconceptions where appropriate; track response rate.
3. Audit each target source and record current wording/state: TripAdvisor.
4. Correct only the sources where facts are missing, conflicting, or outdated. Do not change measurement methodology.
5. Store completion evidence (canonical policy summary, sources reviewed, sources corrected, URLs/screenshots, completion date).
6. Notify Dealality of completion so the next monitoring period can check the expected signal without assuming causation.

TARGET SOURCES

TripAdvisor

DEFINITION OF DONE

- Canonical facts for “TripAdvisor responses” are confirmed by hotel management.
- Each target source is reviewed: TripAdvisor.
- Sources that were incorrect or incomplete are corrected, with URLs or screenshots stored.
- The specific missing/inconsistent items are resolved: designate accountable owner; set response SLA; identify recurring complaint themes monthly; correct factual misconceptions where appropriate; track response rate.
- Accountable owner signs off with completion date.

EXPECTED SIGNAL

Dealality will monitor whether tripadvisor responses recognition and related scenario inclusion change in the next monitoring period. Monitoring alone does not establish causation.

NEXT MONITORING CHECK

Next published ADP run — review TripAdvisor responses attribute recognition, related demand-territory presence, and evidence excerpts for the corrected facts.

5. Accountability & Decisions

Prior Action Review

No prior monthly actions are available yet.

Decisions Required

1. Confirm an accountable owner for each open action (role is pre-suggested; named owner still required).
2. Confirm target completion dates for each open action.
3. Confirm which Watch Item items remain monitor-only versus requiring an open action this month.
4. Set target dates where currently blank ("Owner to be confirmed" / date pending).

What Dealality Will Monitor Next

- AI Consideration and Scenario Presence versus the next published monitoring run.
- Reality Coverage and high-severity attribute recognition rates.
- Displacement pattern involving Crowne Plaza Santo Domingo.
- Follow-up signal for action: Stand up a TripAdvisor management-response program with owner, SLA, and theme tracking — focus: designate accountable owner, set response SLA, identify recurring complaint themes monthly.
- Independent Positioning rank and Portfolio AI Presence (benchmark/index remain suppressed while peer set is below 5).

This review is composed from the certified published Existing Hotel ADP customer report and the published Independent Positioning pack where available. It does not rerun providers, invent metrics, or claim causation from management actions. Final actions are executable playbooks with target sources, implementation steps, and definition of done.
