AI VISIBILITY AUDIT & ACTION PLAN

Bethesda Marriott

Bethesda, Maryland

INITIAL DIGITAL PRESENCE ASSESSMENT

NOVEMBER 2026

1. Executive Audit Summary

Convert Broad Scenario Coverage Into Clearer Buyer Consideration

Bethesda Marriott appears across 71.4% of eligible scenarios and ranks first among four Bonvoy peers, yet consideration is only 30.1%. That gap is not proof of a website defect: it is a measurement signal to investigate. The hotel already has strong meetings, NIH access, dining, and fitness assets; the priority is to make its most defensible demand signals unmistakable and internally consistent.

Performance Snapshot

AI CONSIDERATION	SCENARIO PRESENCE	CERTIFIED PEER POSITION
30.1%	**71.4%**	**#1 of 4**
Share of comparable monitored AI answers that mentioned the hotel	Eligible traveler-need scenarios where the hotel appeared	Highest presence among 4 certified Marriott Bonvoy peers

AI Consideration is the share of comparable monitored answers mentioning the hotel; Scenario Presence is the share of eligible traveler-need scenarios where it appeared; Certified Peer Position compares only the certified four-hotel set. Presence does not equal bookings, revenue, or traveler exposure.

Key Findings

1. The Consideration Gap Is a Signal, Not a Diagnosed Cause

The hotel appears broadly but is mentioned in fewer than one-third of comparable consideration answers despite substantial amenities and demand anchors.

Why it matters. This supports a focused visibility investigation, not a claim that the website caused the result. Official content already verifies NIH, Walter Reed, American University, metro shuttle, dining, and Peloton/TRX fitness.

2. Meetings Inventory Is Strong but Needs One Capacity Language

Marriott lists 18,719 square feet, 27 event rooms, and Grand Ballroom capacity of 450, while marketing also uses approximately 19,000 square feet and seating up to 560.

Why it matters. Rounding or setup style may explain the difference. Sales should qualify each figure and align overview, events, and planner materials rather than framing it as a crisis.

3. NIH Access Is a Defensible Competitive Differentiator

NIH lists Bethesda Marriott on its shuttle route with complimentary service directly to the Clinical Center; Hyatt emphasizes Metro adjacency and approximately 20,000 square feet of meetings.

Why it matters. A planner brief can distinguish NIH shuttle access, breakout depth, and Pooks Hill location without criticizing Hyatt or claiming why ADP displacement occurred.

Recommended Priorities

PRIORITY	ACTION	DESIRED OUTCOME
High	Commercial team: strengthen NIH, government, and corporate signals	Buyer-ready official and partner positioning
High	Sales and Marriott content: reconcile meeting figures within 30 days	Setup-qualified capacity language
Medium	Sales strategy: build a sourced Hyatt planner brief	Defensible competitive distinctions
Optional	Leadership: decide whether association content supports target demand	Documented commercial go/no-go

EXECUTIVE TAKEAWAY

Bethesda Marriott's first-place peer rank should not obscure 30.1% consideration. Its best route forward is to organize verified strengths—direct NIH shuttle access, deep breakout inventory, Pooks Hill positioning, dining, and fitness—into clearer buyer signals, while treating any visibility lift as something to measure later rather than promise now.

MEDIUM	**AVA-BM-003** Build a Planner Brief Against Hyatt's Different Strengths A sourced internal brief can help planners understand fit without attacking Hyatt or claiming superiority, traveler preference, or a causal explanation for the measured displacement. Decide Whether an Association Module Supports Target Demand

OPTIONAL | AWAITING HOTEL DECISION | OPTIONAL OPPORTUNITY | Owner: Hotel Commercial Leadership

Timing: Decision within 30 days; module in 60–90 days if approved

WHAT WE FOUND

The hotel already has substantial meetings and institutional-demand content. A dedicated association module is warranted only if sales identifies a defined audience and use case.

WHY IT MATTERS

A focused module could organize relevant facts and inquiry routing, but generic expansion would add maintenance and cannot be assumed to increase AI consideration or bookings.

RECOMMENDED ACTION

1. Sales records a segment-level go/no-go.
2. If go, define audience, use cases, approved facts, and inquiry owner.
3. Draft a concise module without duplicating generic brand copy.
4. If no-go, document and close the action.

How to Read Findings

- VERIFIED_ISSUE — a directly observed, source-backed discrepancy.
- RECOMMENDED_INVESTIGATION — evidence warrants review but does not prove a defect or cause.
- REQUIRES_HOTEL_CONFIRMATION — hotel leadership must establish the source of truth before correction.
- OPTIONAL_COMMERCIAL_OPPORTUNITY — proceed only if leadership wants the demand.

Responsibilities

- Hotel leadership confirms facts, priorities, and public changes.
- Digital or brand teams implement only approved corrections and document verification.
- Dealality packages measurement context and evidence without implying booking or revenue causation.

How This Relates to Monthly Monitoring

Approved actions may be tracked in a later review. Completing an action does not itself prove a change in AI presence, bookings, or revenue.

Suggested Next Step

Confirm the decision items, then authorize the highest-priority validated work.
