AI VISIBILITY AUDIT & ACTION PLAN

The St. Regis Cap Cana Resort

Cap Cana, Dominican Republic

INITIAL DIGITAL PRESENCE ASSESSMENT

NOVEMBER 2026

1. Executive Audit Summary

Resolve Official Inventory Conflicts and Surface Distinctive Cap Cana Assets

The St. Regis Cap Cana Resort appears in 32 of 47 eligible scenarios and ranks seventh among 11 certified Marriott Bonvoy peers. Its official pages describe a rich resort—signature dining, The Amber Room, Punta Espada, oceanfront events, and multiple pools—but conflicting inventory counts and low ADP recognition for several of those assets make source-of-truth control the first priority.

Performance Snapshot

AI CONSIDERATION	SCENARIO PRESENCE	CERTIFIED PEER POSITION
17.6%	**68.1%**	**#7 of 11**
Mentioned in 33 of 188 comparable monitored AI answers	Present across 32 of 47 eligible traveler-need scenarios	Seventh-highest presence among 11 certified Marriott Bonvoy peers

AI Consideration is the share of 188 comparable monitored answers mentioning the resort; Scenario Presence is the share of 47 eligible traveler-need scenarios where it appeared. Certified Peer Position uses the 11-hotel Marriott Bonvoy set. These measures do not represent bookings, ADR, revenue, or traveler exposure.

Key Findings

1. Dining Inventory Uses Three Different Counting Frames

The overview says eight culinary venues, later says nine culinary and beverage experiences, and lists four restaurants plus four bars.

Why it matters. Guests and partners need a stable distinction among restaurants, bars, cafés, and in-room dining.

2. Events Area Requires a Counting Bridge

The events page presents 6,192, more than 7,000, over 11,200, and over 23,200 square feet.

Why it matters. Indoor, outdoor, gross, and sellable space must be labeled explicitly for planners.

3. Several Signature Assets Are Under-Recognized

ADP recorded 0% for restaurant, meetings, golf access, and signature bar, despite detailed official content.

Why it matters. This is a prioritization signal for clearer facts, not evidence of booking or ranking causation.

TECHNICAL NOTES

ADP recognition is a prioritization signal, not proof of ranking, booking, ADR, or revenue causation.

6. Methodology, Responsibilities & Next Steps

Combines the pinned certified ADP baseline with a bounded review of named public pages and zero-cost technical probes. No paid research, ADP remeasurement, production write, or customer publication was performed.

How to Read Findings

- VERIFIED_ISSUE — a directly observed, source-backed discrepancy.
- RECOMMENDED_INVESTIGATION — evidence warrants review but does not prove a defect or cause.
- REQUIRES_HOTEL_CONFIRMATION — leadership must establish the source of truth before correction.
- OPTIONAL_COMMERCIAL_OPPORTUNITY — proceed only if leadership wants the demand.

Responsibilities

- Hotel leadership confirms facts, priorities, and public changes.
- Digital, brand, and partner teams implement only approved corrections and document verification.
- Dealality packages measurement context and evidence without implying ranking, booking, ADR, or revenue causation.

How This Relates to Monthly Monitoring

Approved actions may be tracked later. Completing an action does not itself prove a change in AI presence, bookings, ADR, or revenue.

Suggested Next Step

Approve the highest-priority source-of-truth decision, then authorize only the validated work.
