AI VISIBILITY AUDIT & ACTION PLAN

voco Cancún Zona Hotelera

Cancún, Quintana Roo

INITIAL DIGITAL PRESENCE ASSESSMENT

NOVEMBER 2026

1. Executive Audit Summary

Establish Clear Location and Meetings Signals Without Assuming Cause

voco Cancún Zona Hotelera recorded 0.4% AI Consideration and appeared in 1.6% of eligible scenarios, with an 85.2% weighted attribute Reality Gap. These results show very low absolute presence but do not prove a website defect or explain the cause. The hotel should first correct the verified mixed-language room headings on the English page, then organize approved location, meetings, dining, pool, and pet-policy facts so buyers can understand the offer. IHG should separately review the bounded 403 responses without weakening security.

Performance Snapshot

AI CONSIDERATION	SCENARIO PRESENCE	REALITY GAP
0.4%	**1.6%**	**85.2%**
Mentioned in 1 of 252 comparable monitored AI answers	Present across 1 of 63 eligible traveler-need scenarios	Weighted attribute gap under RG_WEIGHTED_PARTIAL_V2 — not a booking metric

AI Consideration is the share of 252 comparable monitored answers mentioning the hotel; Scenario Presence is the share of 63 eligible scenarios where it appeared. Reality Gap is a weighted attribute-recognition diagnostic covering 27 tested attributes. None represents bookings, revenue, rank, or traveler exposure.

Key Findings

1. Low Presence Is a Measurement Signal, Not a Diagnosis

The hotel appeared in only one comparable answer and one eligible scenario.
Why it matters. The result supports disciplined content and access review, but no causal website defect should be invented.

2. English Room Content Has Mixed-Language Headings

The English hotel page displays Spanish room-category phrases including “Ultimos pisos” and “Habitaciones modernas...”.
Why it matters. This is a directly observed content-hygiene issue that can interrupt buyer comprehension and should be corrected through IHG content controls.

3. Location and Meetings Facts Need a Buyer-Ready Structure

Official content describes a position across from Playa Langosta, access to the Isla Mujeres ferry and Cancún demand anchors, plus three meeting rooms with the combined Mexico room accommodating up to 300.
Why it matters. Accurate, maintained facts can improve decision context without promising visibility or booking gains.

Recommended Priorities

PRIORITY	ACTION	DESIRED OUTCOME
High	IHG content: correct mixed-language room headings	Consistent English presentation
High	Commercial team: approve location and meetings fact set	Clear Playa Langosta and three-room proposition
Medium	Operations and marketing: align dining, pool, and pet facts	Accurate amenity and fee presentation
Medium	IHG digital: review bounded WAF/bot responses	Documented security-aligned access posture

EXECUTIVE TAKEAWAY

The hotel’s low measured presence warrants careful prioritization, not a causal claim. Correct the verified language issue, approve one buyer-ready fact set, preserve accurate operating details, and investigate crawler access through IHG security governance. Measure later without promising rankings, bookings, or revenue. Digital authority: Destination inclusion matters more than inventing backlink volume.

PARTIAL_PUBLIC_SEARCH — Turismo Cancún reviewed at homepage level. No paid crawl.

EXECUTIVE FINDING

voco Cancún Zona Hotelera has near-zero absolute AI consideration despite a strong Playa Langosta / Isla Mujeres ferry / Convention Center location story. Public partial research did not confirm a Turismo Cancún lodging page with a verified hyperlink to the hotel's IHG URL. Priority: fix EN page hygiene and pursue a destination lodging profile with an official URL.

No third-party hyperlinks to the official hotel website were confirmed in this public-partial pass. Mentions without hyperlinks are classified separately.

   Turismo Cancún is a credible destination authority; hotel-specific outbound IHG backlink was not confirmed in this public pass.

ACTION 02 · AVA-VOC-002

Clarify Location and Meetings Facts

HIGH PRIORITY | NOT STARTED | NEEDS HOTEL CONFIRMATION | Owner: Hotel Commercial Leadership

Timing: Fact brief in 2 weeks; approved updates within 30–45 days

WHAT WE FOUND

Official content places the hotel across from Playa Langosta and near the Isla Mujeres ferry, Puerto Cancún, La Isla, and the Convention Center; meetings content describes Ibiza at 126, Bora Bora at 150, and combined Mexico up to 300.

WHY IT MATTERS

A signed fact set can improve buyer decision context, but the audit does not claim content caused the measured result or will increase bookings.

2. Sign room-by-room areas and setup-qualified capacities.
3. Create concise location and meetings copy using only approved facts.
4. Align the hotel page, meetings page, sales collateral, and priority listings.

Timing: Technical review within 30 days

WHAT WE FOUND

The zero-cost probe received HTTP 403 for robots.txt, sitemap, homepage, property page, and HEAD request.

WHY IT MATTERS

An unintended policy mismatch could limit intended automated clients, but a single research environment does not establish a general outage.

RECOMMENDED ACTION

1. Open an IHG WAF/bot-management ticket with the exact request context.
2. Define intended crawler and partner access policy.
3. Approve only narrow security-safe changes if a conflict is confirmed.

7. Methodology, Responsibilities & Next Steps

Combines the certified ADP baseline with a bounded review of named public pages and zero-cost technical probes. No paid research, ADP remeasurement, production write, or customer publication was performed.

How to Read Findings

- VERIFIED_ISSUE — a directly observed, source-backed discrepancy.
- RECOMMENDED_INVESTIGATION — evidence warrants review but does not prove a defect or cause.
- REQUIRES_HOTEL_CONFIRMATION — leadership must establish the source of truth before correction.
- OPTIONAL_COMMERCIAL_OPPORTUNITY — proceed only if leadership wants the demand.

Responsibilities

- Hotel leadership confirms facts, priorities, and public changes.
- Digital, brand, and partner teams implement only approved corrections and document verification.
- Dealality packages measurement context and evidence without implying ranking, booking, or revenue causation.

How This Relates to Monthly Monitoring

Approved actions may be tracked later. Completing an action does not itself prove a change in AI presence, bookings, or revenue.

Suggested Next Step

Approve the English room-heading corrections and the location-and-meetings fact brief, then authorize implementation.
