AI VISIBILITY AUDIT & ACTION PLAN

Bethesda Marriott

Bethesda, Maryland

INITIAL DIGITAL PRESENCE ASSESSMENT

NOVEMBER 2026

1. Executive Audit Summary

Convert Broad Scenario Coverage Into Clearer Buyer Consideration

Bethesda Marriott appears in 71.4% of eligible scenarios and ranks first among four Bonvoy peers, yet consideration is only 30.1%. That gap is a measurement signal to investigate, not proof of a website defect. Priority work is to keep NIH/government, meetings, dining, and fitness facts accurate and consistent—especially shuttle claims.

Performance Snapshot

AI CONSIDERATION	SCENARIO PRESENCE	CERTIFIED PEER POSITION
30.1%	**71.4%**	**#1 of 4**
Share of comparable monitored AI answers that mentioned the hotel	Eligible traveler-need scenarios where the hotel appeared	Highest presence among 4 certified Marriott Bonvoy peers

AI Consideration = share of comparable answers mentioning the hotel. Scenario Presence = share of eligible traveler-need scenarios with an appearance. Peer Position compares only the certified four-hotel set. Presence is not bookings or revenue.

Key Findings

1. The Consideration Gap Is a Signal, Not a Diagnosed Cause

Broad scenario coverage with 30.1% consideration supports a focused visibility review. Official pages already verify Metro shuttle, NIH/Walter Reed/AU proximity, Cooper's Mill, and Peloton/TRX fitness.

Why it matters. Treat the gap as a signal to investigate. Do not claim the website caused the result.

2. Meetings Inventory Needs One Capacity Language

Events lists 18,719 sq ft, 27 rooms, and Grand Ballroom capacity of 450; marketing also uses ~19,000 sq ft and seating up to 560.

Why it matters. Rounding or setup style may explain the difference. Qualify each figure across overview, events, and planner materials.

3. NIH Shuttle Claims Need Hotel Confirmation

Marriott verifies a complimentary Metro/Downtown Bethesda shuttle and names NIH nearby. The current NIH Patient Hotel Shuttles page does not list Bethesda Marriott among Clinical Center stops.

Why it matters. Do not present an NIH-operated Clinical Center route as verified for this hotel. Confirm any hotel-operated NIH service before buyer-facing use.

Recommended Priorities

PRIORITY	ACTION	DESIRED OUTCOME
High	Confirm NIH access facts; keep Metro shuttle and proximity language accurate	Buyer-ready, source-true institutional signals
High	Sales + Marriott content: reconcile meeting figures in 30 days	Setup-qualified capacity language
Medium	Sales strategy: sourced Hyatt planner brief (no false shuttle claims)	Defensible competitive distinctions
Optional	Leadership: decide if association content supports target demand	Documented commercial go/no-go

EXECUTIVE TAKEAWAY

First-place peer rank should not obscure 30.1% consideration. Organize verified strengths—Metro shuttle, confirmed NIH proximity (not an unverified Clinical Center route), breakout depth, dining, and fitness—into clearer buyer signals, and measure any visibility change later rather than promising it now. Digital authority: NIH authority is contextual—not a verified hotel listing backlink.

2. Priority Findings & Opportunities

The most important verified corrections and opportunities for this hotel. Full research detail remains in the AVA record.

PRIORITY: HIGH · **PLATFORM:** BETHESDA MARRIOTT OFFICIAL OVERVIEW — METRO SHUTTLE + NIH PROXIMITY

Issue: Marriott names NIH, Walter Reed, and American University and verifies a complimentary Metro/Downtown Bethesda shuttle. The NIH Patient Hotel Shuttles page currently lists other Bethesda hotels for patient/family Clinical Center transport and does not list Bethesda Marriott. Hotel-operated NIH service was not verified on the live Marriott overview.

Why it matters: Institutional demand signals remain commercially relevant, but inaccurate shuttle claims create buyer and compliance risk. Making verified facts clear may improve decision context; this audit does not claim they caused or will cure the consideration gap.

Recommended action: Confirm NIH Access Facts and Keep Institutional Signals Accurate

1. Hotel confirms whether any hotel-operated NIH or Clinical Center shuttle operates today, including hours, eligibility, and destination (campus vs Clinical Center).
2. Approve exact language that separates: (a) Metro/Downtown Bethesda hotel shuttle; (b) NIH proximity; (c) any confirmed hotel NIH service; (d) NIH-operated patient hotel shuttles.
3. Map approved facts across overview, sales collateral, and priority partner listings; remove unsupported NIH-route claims.
4. Verify links, inquiry routing, and live copy against the signed fact sheet.
5. A signed review records whether hotel-operated NIH/Clinical Center transport exists, cites current sources, and records unknowns.

Responsible party: Hotel Commercial Leadership

Evidence: Bethesda Marriott official overview — Metro shuttle + NIH proximity

PRIORITY: HIGH · **PLATFORM:** OFFICIAL MEETINGS AND EVENTS PAGE

Issue: The events page lists 18,719 square feet, 27 event rooms, and Grand Ballroom capacity of 450; other marketing uses approximately 19,000 square feet and seating up to 560.

Why it matters: The difference may reflect rounding or room/setup style, not an error. Sales should define each number and align overview, events, and planner materials so buyers compare like with like.

Recommended action: Align Meeting-Space and Capacity Language

1. Sales signs a room-by-room inventory with setup capacities.
2. Define where 18,719 versus 19,000 and 450 versus 560 each apply.
3. Submit precise Marriott and collateral edits only where needed.
4. Verify live pages and retain the signed capacity schedule.
5. A signed review for “Align Meeting-Space and Capacity Language” records verified facts, unknowns, and the hotel decision.

Responsible party: Director of Sales / Events Leadership

Evidence: Official meetings and events page

PRIORITY: MEDIUM · **PLATFORM:** OFFICIAL WEBSITE

Issue: Confirm that meetings, dining, and amenities facts on the official page match the hotel's approved source of truth; align third-party listings after confirmation.

Why it matters: Digital content readiness depends on one approved source of truth before third-party outreach.

Recommended action: Reconcile Meeting and Event Facts Across Sources

1. Establish one approved fact sheet; update the official page first; then cascade to GBP/OTAs when values are confirmed.
2. Do not change unconfirmed values on OTAs until the hotel approves the fact sheet.
3. Opportunity owner and required facts confirmed with hotel leadership.
4. Outreach or listing update request filed with supporting evidence.
5. Live destination/partner page checked and archived after update (or documented refusal).

Responsible party: Hotel Sales & Marketing

Evidence: Official website

PRIORITY: MEDIUM · **PLATFORM:** NIH ORS PATIENT HOTEL SHUTTLES

Issue: NIH ORS shuttle page is verified context without listing Bethesda Marriott; Clinical Center hotels URL stays rejected. Destination lodging backlink not confirmed in this pass.

Why it matters: Government-travel buyers need accurate institutional context and a clean official Marriott path.

Recommended action: Pursue Local Destination Profile; Protect NIH Evidence Integrity

1. Confirm hotel-operated NIH shuttle facts with operations.
2. Submit destination lodging profile with Marriott URL.
3. QA that Clinical Center hotels URL never reappears in PDF annotations.
4. Archive destination listing evidence.
5. Opportunity owner and required facts confirmed with hotel leadership.

Responsible party: Hotel Sales / Marketing

Evidence: NIH ORS Patient Hotel Shuttles

3. Digital Platform Assessment

Exact verified listings where available. Rows distinguish corrections, content improvements, distribution opportunities, verified-consistent listings, partial assessments, and research follow-ups. Access restrictions are not treated as content defects.

PLATFORM	LISTING	ASSESSMENT	FINDING	NEXT ACTION
No platform rows packaged.				

4. Website & Content Improvements

Specific hotel or brand pages that affect how travelers understand and select the property. This section does not repeat ADP traveler-intent analysis.

Page: Bethesda Marriott official overview — Metro shuttle + NIH proximity

Issue: Marriott names NIH, Walter Reed, and American University and verifies a complimentary Metro/Downtown Bethesda shuttle. The NIH Patient Hotel Shuttles page currently lists other Bethesda hotels for patient/family Clinical Center transport and does not list Bethesda Marriott. Hotel-operated NIH service was not verified on the live Marriott overview.

Recommended action: Confirm NIH Access Facts and Keep Institutional Signals Accurate

1. Hotel confirms whether any hotel-operated NIH or Clinical Center shuttle operates today, including hours, eligibility, and destination (campus vs Clinical Center).
2. Approve exact language that separates: (a) Metro/Downtown Bethesda hotel shuttle; (b) NIH proximity; (c) any confirmed hotel NIH service; (d) NIH-operated patient hotel shuttles.
3. Map approved facts across overview, sales collateral, and priority partner listings; remove unsupported NIH-route claims.
4. Verify links, inquiry routing, and live copy against the signed fact sheet.

Why it matters: Institutional demand signals remain commercially relevant, but inaccurate shuttle claims create buyer and compliance risk. Making verified facts clear may improve decision context; this audit does not claim they caused or will cure the consideration gap.

Responsible party: Hotel Commercial Leadership

Evidence: View page

Page: Official meetings and events page

Issue: The events page lists 18,719 square feet, 27 event rooms, and Grand Ballroom capacity of 450; other marketing uses approximately 19,000 square feet and seating up to 560.

Recommended action: Align Meeting-Space and Capacity Language

1. Sales signs a room-by-room inventory with setup capacities.
2. Define where 18,719 versus 19,000 and 450 versus 560 each apply.
3. Submit precise Marriott and collateral edits only where needed.
4. Verify live pages and retain the signed capacity schedule.

Why it matters: The difference may reflect rounding or room/setup style, not an error. Sales should define each number and align overview, events, and planner materials so buyers compare like with like.

Responsible party: Director of Sales / Events Leadership

Evidence: View page

Page: Bethesda Marriott official overview

Issue: Confirm that meetings, dining, and amenities facts on the official page match the hotel's approved source of truth; align third-party listings after confirmation.

Recommended action: Reconcile Meeting and Event Facts Across Sources

1. Establish one approved fact sheet; update the official page first; then cascade to GBP/OTAs when values are confirmed.
2. Do not change unconfirmed values on OTAs until the hotel approves the fact sheet.
3. Opportunity owner and required facts confirmed with hotel leadership.
4. Outreach or listing update request filed with supporting evidence.

Why it matters: Digital content readiness depends on one approved source of truth before third-party outreach.

Responsible party: Hotel Sales & Marketing

Evidence: View page

Page: Official property overview

Issue: The hotel already has substantial meetings and institutional-demand content. A dedicated association module is warranted only if sales identifies a defined audience and use case.

Recommended action: Decide Whether an Association Module Supports Target Demand

1. Sales records a segment-level go/no-go.
2. If go, define audience, use cases, approved facts, and inquiry owner.
3. Draft a concise module without duplicating generic brand copy.
4. If no-go, document and close the action.

Why it matters: A focused module could organize relevant facts and inquiry routing, but generic expansion would add maintenance and cannot be assumed to increase AI consideration or bookings.

Responsible party: Hotel Commercial Leadership

Evidence: View page

5. Digital Authority & Backlink Opportunities

Public research verified 1 property-specific third-party hyperlink(s) and 2 external reference(s). Brand and hotel-operated destinations were evaluated separately.

UNLINKED MENTION

Source: NIH ORS — Patient Hotel Shuttles

Observation: Authoritative NIH shuttle resource; does not list Bethesda Marriott. Not a hotel website backlink. Broken Clinical Center hotels path remains rejected.

Commercial relevance: This referring website already mentions Bethesda Marriott; adding the correct official URL makes the reference actionable.

Recommended action: Contact NIH ORS — Patient Hotel Shuttles to request a property-specific hyperlink to the hotel's approved official website where the publisher allows it.

Responsible party: Hotel Marketing / Partnerships

VERIFIED HEALTHY BACKLINK

Source: Bethesda Marriott Hotel - Visit Montgomery

Observation: Bethesda Marriott Hotel - Visit Montgomery (official destination / tourism page) includes a verified property-specific hyperlink to https://www.marriott.com/en-us/hotels/wasbt-bethesda-marriott/overview/.

Commercial relevance: This official destination / tourism page already provides a working referral path for travelers who discover Bethesda Marriott through that channel.

Destination: Official / approved hotel URL — Destination matches a verified hotel/brand URL.

Recommended action: No correction required. Periodically confirm the live destination still resolves to the hotel-approved URL.

Responsible party: Hotel Marketing / Partnerships

Full referring-domain inventory is retained in AVA research records — not printed here. Directory presence is not counted as a backlink. Healthy existing backlinks are not listed as problems.

6. Implementation Roadmap

Same canonical actions as Priority Findings — execution view only. Escalate brand-controlled edits through the brand digital team when the hotel cannot edit the page directly.

PRIORITY	ACTION	OWNER	TIMING	EFFORT	EVIDENCE

HIGH	Align Meeting-Space and Capacity Language	Director of Sales / Events Leadership	Immediate	MEDIUM	View
MEDIUM	Reconcile Meeting and Event Facts Across Sources	Hotel Sales & Marketing	Next 30 days	MEDIUM	View
MEDIUM	Pursue Local Destination Profile; Protect NIH Evidence Integrity	Hotel Sales / Marketing	Next 30 days	MEDIUM	View
LOW	Decide Whether an Association Module Supports Target Demand	Hotel Commercial Leadership	Subsequent	MEDIUM	View

7. Methodology & Limitations

Dealality AVA assesses the hotel's public digital presence. Listing existence and content assessment are tracked separately; Google Travel entities are not treated as Google Business Profile / Maps place listings. Assessment date: 2026-11-05. Readiness: see certification. ADP traveler-intent detail is limited to the Executive Audit Summary.
