INITIAL DIGITAL PRESENCE ASSESSMENT

1. Executive Audit Summary

Reconcile Hilton Amenities With Four 0% Recognition Gaps

The hotel ranks #2 of 6 in its certified Hilton Honors set but appears in only 10.4% of comparable answers and 28.3% of eligible scenarios. The immediate task is to reconcile explicit first-party facts with the staged reality gaps, while treating technical-probe results as bounded observations rather than causal proof.

Mentioned in 22 of 212 comparable monitored AI answers	Present across 15 of 53 eligible traveler-need scenarios	Second-highest presence among 6 certified Hilton Honors peers

Key Findings

1. Reconcile Hilton Amenities With Four 0% Recognition Gaps

Hilton's official hotel-information page lists on-site restaurant, room service, Digital Key, and Connecting Rooms; the certified reality-gap read recorded 0% recognition for all four.

Why it matters. These facts affect family, dining, and convenience decisions, but the gap does not prove that official-page content caused low consideration.

2. Build a Source-Backed Celebrations and Events Entry Path

Celebrations & Events was the softest monitored territory at 0% scenario capture. Hilton's official hotel-information page lists meeting rooms, but the available evidence does not establish a complete celebration proposition.

Why it matters. The hotel should confirm actual event inventory and target occasions before publishing expanded positioning.

3. Strengthen City-View and Walkable-Location Decision Context

The certified read recorded 0% for City Views and Walkable Downtown while the property identity is Hilton New York Times Square at 234 West 42nd Street.

Why it matters. Location identity and view claims are material, but exact view categories and walking-distance language require hotel-approved facts.
