AI VISIBILITY AUDIT & ACTION PLAN

Waterstone Resort & Marina

Boca Raton, Florida

INITIAL DIGITAL PRESENCE ASSESSMENT

NOVEMBER 2026

1. Executive Audit Summary

Reconcile the Event-Space Story and Establish the Canonical Hotel Domain

Waterstone has meaningful reach—53.5% consideration and 76.6% scenario presence—but ranks fifth among six Hilton Honors peers. Its active site presents a commercially useful marina, dining, and meetings offer; the immediate quality risk is that trusted sources publish materially different event-space totals while the historically used domain does not reliably lead research to that active offer.

Performance Snapshot

AI CONSIDERATION	SCENARIO PRESENCE	CERTIFIED PEER POSITION
53.5%	**76.6%**	**#5 of 6**
Share of comparable monitored AI answers that mentioned the hotel	Eligible traveler-need scenarios where the hotel appeared	Fifth among 6 certified Hilton Honors peers

AI Consideration is the share of comparable monitored answers mentioning the hotel; Scenario Presence is the share of eligible traveler-need scenarios where it appeared; Certified Peer Position compares only the certified six-hotel set. Presence does not equal bookings, revenue, or traveler exposure.

Key Findings

1. Two Verified Meeting Figures Need Hotel Reconciliation

waterstoneboca.com repeatedly states 18,899 square feet of meeting space (five spaces; 220-plus guests). A previously cited Hilton Curio listing figure (~7,500 sq ft / ballroom 225) could not be re-verified in this recovery because the Hilton property URL returned a brand error page under HTTP and browser checks—so that brand figure is not used as current customer-facing evidence.

Why it matters. Do not select a winner. The difference may be indoor versus indoor-plus-outdoor, flexible versus total, or an outdated Hilton record; events leadership must confirm definitions first.

2. Canonical Domain Control Is a High-Priority Investigation

waterstoneboca.com identifies itself as the Official Site and its accessibility statement names www.waterstoneboca.com, while the historically used waterstoneresort.com failed, timed out, or served non-hotel content during research.

Why it matters. Management should confirm ownership, canonical tags, redirects, booking paths, and partner links before changing infrastructure or describing either domain as universally broken.

3. The Active Site Already Carries Commercial Strength

The working site presents SeaSpray and Kasumi dining, marina access, rooms, and detailed meeting content, while Hilton supplies a trusted Curio profile.

Why it matters. After facts and domain control are settled, the agency can align a distinctive waterfront resort story across trusted channels without inventing a new proposition.

Recommended Priorities

PRIORITY	ACTION	DESIRED OUTCOME
High	Events leadership: reconcile 7,500+ and 18,899 square feet in one week	Defined indoor, outdoor, flexible, and total space
High	GM and digital agency: confirm canonical domain and redirects in two weeks	One reliable official discovery path
Medium	Agency and Hilton support: align approved property facts	Consistent marina, dining, and meetings information

EXECUTIVE TAKEAWAY

Waterstone's active digital offer is commercially credible; the fastest quality gain is to remove ambiguity. Define exactly what 7,500-plus and 18,899 square feet each count, then make waterstoneboca.com and every trusted partner path point to the same approved resort story. Digital authority: Local leisure guides already mention

Waterstone's marina dock partner and on-site SeaSpray dining—useful verified external mentions. Digital content readiness: Waterstone's hotel-operated site (waterstoneboca.com) is the verified guest-facing source of truth and should remain canonical once meeting-space definitions and partner links are aligned.

2. Priority Findings & Opportunities

The most important verified corrections and opportunities for this hotel. Full research detail remains in the AVA record.

PRIORITY: HIGH · **PLATFORM:** ACTIVE HOTEL MEETINGS PAGE — 18,899 SQUARE FEET

Issue: A previously cited Hilton listing stated over 7,500 square feet of flexible meeting space and ballroom capacity up to 225. The active hotel page repeatedly states 18,899 square feet, five different spaces, and accommodation for 220-plus guests. That Hilton/brand page could not be re-verified in current checks (brand error / access failure).

Why it matters: Only the hotel-operated meetings figure is currently verified as public evidence; the Hilton/brand figure could not be re-verified. They may describe indoor versus indoor-plus-outdoor, flexible versus total, or an outdated Hilton record. The hotel—not the audit—must reconcile the definitions before correction.

Recommended action: Establish One Approved Meeting-Space Source of Truth

1. Events leadership defines total indoor, outdoor, flexible, and ballroom space.
2. Document whether each published number uses a different scope.
3. Approve one source-of-truth table.
4. Submit precise corrections to Hilton and/or the active site.
5. A signed space inventory defines every component and reconciles 7,500+ and 18,899 square feet.

Responsible party: Director of Sales / Events Leadership

Evidence: Active hotel meetings page — 18,899 square feet

PRIORITY: HIGH · **PLATFORM:** ACTIVE GUEST-FACING HOTEL SITE

Issue: waterstoneboca.com identifies itself as the Official Site and its accessibility statement names www.waterstoneboca.com. The historically used waterstoneresort.com failed, timed out, or served non-hotel content during bounded research.

Why it matters: A clear canonical-domain decision helps guests, partners, and automated systems identify the hotel's current official source. Probe failures alone do not establish a universal outage.

Recommended action: Resolve Official-Domain and Redirect Consistency

1. Confirm ownership and intended role of both domains.
2. Review DNS, TLS, hosting, redirects, canonical tags, and partner links.
3. Choose the hotel-approved canonical domain.
4. Implement and verify redirects only if approved.
5. A domain-control memo records ownership, intended use, DNS/hosting state, redirect behavior, and canonical choice.

Responsible party: Hotel GM / Digital Leadership

Evidence: Active guest-facing hotel site — Official Site

PRIORITY: MEDIUM · **PLATFORM:** GREAT LOCATIONS GUIDE

Issue: Great Locations references Waterstone/SeaSpray without an href to waterstoneboca.com; Hilton property URL unverifiable for customer evidence.

Why it matters: Domain identity and partner accuracy are the fastest authority controls.

Recommended action: Publish Partner-Ready Canonical Domain & Marina Facts Pack

1. Approve waterstoneboca.com as canonical.
2. Create marina/dining/meetings fact sheet.
3. Request destination lodging inclusion.
4. Ask partners to link the canonical URL where allowed.
5. Canonical domain decision signed.

Responsible party: Hotel General Manager / Marketing

Evidence: Great Locations guide

3. Digital Platform Assessment

Exact verified listings where available. Rows distinguish corrections, content improvements, distribution opportunities, verified-consistent listings, partial assessments, and research follow-ups. Access restrictions are not treated as content defects.

PLATFORM	LISTING	ASSESSMENT	FINDING	NEXT ACTION
Brand property page	View Hilton property profile	Partially assessed	Exact listing verified; important page content could not be fully audited due to access restrictions. This is not evidence of incorrect hotel content.	Establish One Approved Meeting-Space Source of Truth Owner: Director of Sales / Events Leadership
Tripadvisor	View Tripadvisor listing	Partially assessed	Exact listing verified; important page content could not be fully audited due to access restrictions. This is not evidence of incorrect hotel content.	No content correction prescribed from restricted page body — hotel may spot-check key facts when logged in.
Expedia	View Expedia listing	Partially assessed	Exact listing verified; important page content could not be fully audited due to access restrictions. This is not evidence of incorrect hotel content.	No content correction prescribed from restricted page body — hotel may spot-check key facts when logged in.

Also verified with no material issue in this assessment scope: Hotel-operated website; Google Business Profile / Google Maps; Booking.com; Apple Maps.

4. Website & Content Improvements

Specific hotel or brand pages that affect how travelers understand and select the property. This section does not repeat ADP traveler-intent analysis.

Page: Hotel meetings page

Issue: A previously cited Hilton listing stated over 7,500 square feet of flexible meeting space and ballroom capacity up to 225. The active hotel page repeatedly states 18,899 square feet, five different spaces, and accommodation for 220-plus guests. That Hilton/brand page could not be re-verified in current checks (brand error / access failure).

Recommended action: Establish One Approved Meeting-Space Source of Truth

1. Events leadership defines total indoor, outdoor, flexible, and ballroom space.
2. Document whether each published number uses a different scope.
3. Approve one source-of-truth table.
4. Submit precise corrections to Hilton and/or the active site.

Why it matters: Only the hotel-operated meetings figure is currently verified as public evidence; the Hilton/brand figure could not be re-verified. They may describe indoor versus indoor-plus-outdoor, flexible versus total, or an outdated Hilton record. The hotel—not the audit—must reconcile the definitions before correction.

Responsible party: Director of Sales / Events Leadership

Evidence: View page

Page: Active hotel homepage

Issue: waterstoneboca.com identifies itself as the Official Site and its accessibility statement names www.waterstoneboca.com. The historically used waterstoneresort.com failed, timed out, or served non-hotel content during bounded research.

Recommended action: Resolve Official-Domain and Redirect Consistency

1. Confirm ownership and intended role of both domains.
2. Review DNS, TLS, hosting, redirects, canonical tags, and partner links.
3. Choose the hotel-approved canonical domain.
4. Implement and verify redirects only if approved.

Why it matters: A clear canonical-domain decision helps guests, partners, and automated systems identify the hotel’s current official source. Probe failures alone do not establish a universal outage.

Responsible party: Hotel GM / Digital Leadership

Evidence: View page

Page: Great Locations guide

Issue: Great Locations references Waterstone/SeaSpray without an href to waterstoneboca.com; Hilton property URL unverifiable for customer evidence.

Recommended action: Publish Partner-Ready Canonical Domain & Marina Facts Pack

1. Approve waterstoneboca.com as canonical.
2. Create marina/dining/meetings fact sheet.
3. Request destination lodging inclusion.
4. Ask partners to link the canonical URL where allowed.

Why it matters: Domain identity and partner accuracy are the fastest authority controls.

Responsible party: Hotel General Manager / Marketing

Evidence: View page

5. Digital Authority & Backlink Opportunities

This public review did not confirm third-party websites linking to the hotel's official pages. 1 third-party reference mention the hotel without a property hyperlink. That is a visibility opportunity to pursue selectively — not proof of weak AI performance.

UNLINKED MENTION

Source: greatlocations.com

Observation: Hotel mentioned in page text; no property-specific hyperlink confirmed.

Commercial relevance: Readers using this leisure / local activities guide are already researching local leisure activities near Waterstone Resort & Marina; a correct hotel link can turn that interest into a direct visit or inquiry.

Recommended action: Contact the publisher of greatlocations.com to request an appropriate property-specific hyperlink to the hotel's approved official website, and confirm the hotel name and location are accurate.

Responsible party: Hotel Marketing / Partnerships

OPPORTUNITY — CONFIRM BEFORE PRESCRIBING COPY CHANGES

Source: WeddingWire

Observation: WeddingWire (wedding directory listing) appears relevant, but listing contents could not be fully verified because access was restricted during research.

Commercial relevance: Wedding planners discover Boca venues here. Confirming the hotel-operated site (waterstoneboca.com) as the official link strengthens wedding demand capture.

Destination: Access-restricted destination — Listing access was restricted — confirm contents before claiming specific copy defects.

Recommended action: Submit https://www.waterstoneboca.com/ as the official property URL on the WeddingWire venue profile. Automated access to WeddingWire was restricted during this audit — confirm listing contents in a browser before claiming specific copy changes.

Responsible party: Hotel Marketing / Partnerships

Limitation: Access restricted during research.

Full referring-domain inventory is retained in AVA research records — not printed here. Directory presence is not counted as a backlink. Healthy existing backlinks are not listed as problems.

6. Implementation Roadmap

Same canonical actions as Priority Findings — execution view only. Escalate brand-controlled edits through the brand digital team when the hotel cannot edit the page directly.

PRIORITY	ACTION	OWNER	TIMING	EFFORT	EVIDENCE
HIGH	Establish One Approved Meeting-Space Source of Truth	Director of Sales / Events Leadership	Immediate	MEDIUM	View
HIGH	Resolve Official-Domain and Redirect Consistency	Hotel GM / Digital Leadership	Immediate	MEDIUM	View
MEDIUM	Publish Partner-Ready Canonical Domain & Marina Facts Pack	Hotel General Manager / Marketing	Next 30 days	MEDIUM	View

7. Methodology & Limitations

Dealality AVA assesses the hotel's public digital presence. Listing existence and content assessment are tracked separately; Google Travel entities are not treated as Google Business Profile / Maps place listings. Assessment date: 2026-11-05. Readiness: PASS. ADP traveler-intent detail is limited to the Executive Audit Summary.
