SITUATION

A 140-key independent beachfront hotel in Costa Rica is evaluating affiliation and third-party management. The owner seeks distribution and brand-path clarity while retaining control over timing, audience, and sharing.

WHAT LOOKS CLEAR SO FAR

- Conversion intent and independent operating history documented
- Room count, positioning, and deal-structure direction stated
- Owner objectives emphasize selective conversations—not broad circulation

BRAND PATH VIEW

Illustrative fit signals suggest lifestyle, soft-brand, and upscale pathways may merit review. PIP scope and incentive assumptions require owner and brand validation—not recommendations.

CURRENT POSTURE

Structured readiness view: Advancing (74/100 illustrative). Core project context is captured; governance, PIP scope, and operating-model transition remain open. Selected external outreach is not yet appropriate without owner validation.

WHAT IS NOT CLEAR YET

- PIP / CapEx budget range and owner tolerance
- Governance and outreach authorization
- Soft vs hard brand preference and operator economics

OPERATOR PATH VIEW

An operating-model transition is in scope: owner-operated today, third-party management under review. Company alignment signals are for structured review, not a shortlist.

OWNER / ADVISOR TAKEAWAY

This may be as much an operating-model and readiness question as a brand-selection question. Open items should be resolved before expanding conversations.

Treat this phase as readiness and pathway validation. Confirm sharing preferences before any selected conversations.

SUGGESTED NEXT STEP

Validate PIP range and governance, refresh readiness after intake updates, and hold an owner/advisor session to confirm in-scope pathways.

OUTREACH POSTURE

Internal and advisor review only. Any partner contact occurs only after the owner confirms audience, timing, and materials.
