Executive Conclusion

Casas del XVI's primary issue is entering AI consideration at all, especially for Meetings & Groups.

What the Data Is Telling Us

AI Consideration is 10.6%, so the hotel appears in only a limited share of individual comparable responses. When the hotel is absent, InterContinental Real Santo Domingo is a leading observed alternative in those gaps — an evidence lead for review, not an automatic proof of recurring substitution. Rank tactics have limited value until relevance improves. The primary constraint is becoming part of the answer set for the traveler needs the hotel currently misses. Softest Scenario Capture is Group / Meeting at 0.0%. InterContinental Real Santo Domingo most often appears when the hotel is missing (36 scenarios).

Why It Matters

Fine-tuning rank against individual competitors will have limited value until the hotel becomes relevant in more of the traveler needs it currently misses. Entry problems and rank problems require different management attention. If leadership optimizes competitor comparisons first, the hotel can look busy while still missing the larger answer-set gap.

Where the Pattern Is Concentrated

Group / Meeting is the softest Scenario Capture at 0.0%. Focus where the gap is concentrated rather than treating every territory equally. InterContinental Real Santo Domingo appears most often when the hotel is missing (36 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 40.0% (6 of 15 attributes). Start with gaps that matter operationally — beginning with Meetings Capability.

What Management Should Focus On Now

Focus first on how the hotel is represented for Meetings & Groups. Review whether the attributes, positioning, and use cases most relevant to those travelers are complete and consistently represented across priority sources. Treat competitor-rank tactics as secondary until entry improves.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change. Independent Positioning (#5 of 5; Portfolio AI Presence 16.1%) is peer-set context — keep it separate from Core demand metrics.

What to Review Next

Compare evidence from scenarios where InterContinental Real Santo Domingo appears with the property information currently available for Casas del XVI. Check entry cues first — product type, occasion, and location framing — before broadening the review to secondary attributes.
