BIGGEST STRENGTH

Often placed near the top when AI ranks hotels

Among AI answers where hotel ranking could be measured, Castillo Hotel Son Vida, a Luxury Collection Hotel, Mallorca appeared in the Top 3 77.8% of the time. This shows how prominently the hotel is positioned when AI includes it.

BIGGEST CONSTRAINT

AI does not fully reflect the property

AI currently reflects 12.9% of the monitored facts and attributes that define the hotel. Important parts of the property's proposition are not consistently reflected in AI results.

CHANGE SINCE LAST COMPARABLE RUN

No comparable prior official period yet

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.

Executive Conclusion

Castillo Hotel Son Vida, a Luxury Collection Hotel, Mallorca's priority is a Reality Gap in how a distinctive part of the proposition is represented in AI answers.

What the Data Is Telling Us

Ballroom is recognized in only 3% of monitored answers. That is low enough to matter commercially if the attribute is part of how the hotel should win relevant traveler needs. Hotel Saratoga also appears in related absent scenarios, which can compound the representation miss. Broader Scenario Presence (62.1%) and Consideration (50%) do not, by themselves, prove the distinctive attribute is traveling into answers. Softest Scenario Capture is Adventure at 0.0%.

Why It Matters

If distinctive property attributes are weakly represented, the hotel can look broadly visible while still losing the moments where its real proposition should matter. This is a representation problem first, not automatically a peer-competition program.

Where the Pattern Is Concentrated

Adventure is the softest Scenario Capture at 0.0%, while Business Travel show broader coverage. Focus where the gap is concentrated rather than treating every territory equally. Hotel Saratoga appears most often when the hotel is missing (3 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 12.9% (4 of 31 attributes). Start with gaps that matter operationally — beginning with On-Site Restaurant.

What Management Should Focus On Now

Focus first on Ballroom. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change. Independent Positioning (#1 of 4; Portfolio AI Presence 35.7%) is peer-set context — keep it separate from Core demand metrics.

What to Review Next

Open Reality Gap evidence for Ballroom and compare recognition cues with official property pages and high-authority travel sources. Then check a small set of related demand scenarios for whether the attribute appears when competitors are named.

2. Demand & Competitive Movement

Material Movement
