Platform Executive Summary

BIGGEST STRENGTH

Often placed near the top when AI ranks hotels

Among AI answers where hotel ranking could be measured, Hotel Caribe by Faranda Grand, a member of Radisson Individuals appeared in the Top 3 67.6% of the time. This shows how prominently the hotel is positioned when AI includes it.

BIGGEST CONSTRAINT

Not appearing consistently in AI answers

The hotel appeared in at least one AI answer for 60.4% of the traveler needs we tested, but across all individual AI answers it appeared 30.7% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

Executive Conclusion

Hotel Caribe by Faranda Grand, a member of Radisson Individuals reaches many monitored demand scenarios, but consideration consistency is the primary constraint.

What the Data Is Telling Us

Scenario Presence at 73.2% shows broad recognition across monitored traveler needs. AI Consideration at 47.3% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Family Travel; Adventure remain stronger. When the hotel is absent, Hyatt Regency Cartagena most often appears (18 scenarios).

Why It Matters

Broad scenario reach without consistent appearance in AI answers means the hotel is known in the demand set but not reliably carried into traveler-facing answers. Management attention should start with consistency of representation, not with assuming the hotel needs an entirely new competitive set.

Where the Pattern Is Concentrated

Family Travel is the softest Scenario Capture at 40.0%, while Adventure show broader coverage. The inclusion issue is concentrated, not universal. Hyatt Regency Cartagena appears most often when the hotel is missing (18 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 20.7% (6 of 29 attributes). Start with gaps that matter operationally — beginning with Large Ballroom / Event Capacity.

What Management Should Focus On Now

Focus first on consistency of representation for Business Travel. Confirm priority sources present the same use cases and attributes that appear in scenarios where the hotel is absent, and close gaps that repeatedly coincide with cases where the hotel is missing.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change. Independent Positioning (#2 of 4; Portfolio AI Presence 19.6%) measures relative standing among loyalty peers. Strong peer rank does not mean consistent inclusion across the wider demand set.

What to Review Next

Compare high-presence versus low-consideration scenarios and inspect which sources and attributes appear when the hotel is missing. Use that evidence pack before changing channel strategy.

2. Demand & Competitive Movement
