Platform Executive Summary

BIGGEST STRENGTH

Often placed near the top when AI ranks hotels

Among AI answers where hotel ranking could be measured, JW Marriott Hotel Santo Domingo appeared in the Top 3 87.7% of the time. This shows how prominently the hotel is positioned when AI includes it.

BIGGEST CONSTRAINT

Not appearing consistently in AI answers

The hotel appeared in at least one AI answer for 97.9% of the traveler needs we tested, but across all individual AI answers it appeared 65.1% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

CHANGE SINCE LAST COMPARABLE RUN

No comparable prior official period yet

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.

Executive Conclusion

JW Marriott Hotel Santo Domingo reaches many monitored demand scenarios, but consideration consistency is the primary constraint.

What the Data Is Telling Us

Scenario Presence is 97.9% while AI Consideration is 65.1%. The hotel is therefore relevant across a wide share of monitored traveler needs, yet it is not carried into individual answers nearly as consistently. Softness concentrates in Family Travel versus stronger Leisure Travel. El Embajador, a Royal Hideaway Hotel often fills absences in those weaker contexts. That contrast is more important than either metric alone. Softest coverage today is Family Travel at 80.0% Scenario Capture. When absent, El Embajador, a Royal Hideaway Hotel appears most often (1 scenarios).

Why It Matters

Broad scenario reach without consistent appearance in AI answers means the hotel is known in the demand set but not reliably carried into traveler-facing answers. Management attention should start with consistency of representation, not with assuming the hotel needs an entirely new competitive set.

Where the Pattern Is Concentrated

Family Travel is the softest Scenario Capture at 80.0%, while Business Travel, Leisure Travel, and Group / Meeting show broader coverage. Focus where the gap is concentrated rather than treating every territory equally. El Embajador, a Royal Hideaway Hotel appears most often when the hotel is missing (1 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 40.9% (9 of 22 attributes). Start with gaps that matter operationally — beginning with On-Site Restaurant.

What Management Should Focus On Now

Focus first on consistency of representation for Family Travel. Confirm priority sources present the same use cases and attributes that appear in scenarios where the hotel is absent, and close gaps that repeatedly coincide with cases where the hotel is missing.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change. Independent Positioning (#1 of 4; Portfolio AI Presence 87.5%) is peer-set context — keep it separate from Core demand metrics.

What to Review Next

Compare high-presence versus low-consideration scenarios and inspect which sources and attributes appear when the hotel is missing. Use that evidence pack before changing channel strategy.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

> Family Travel is the clearest softness at 80.0% Scenario Capture. Business Travel, Leisure Travel, and Group / Meeting show broader coverage — softness is concentrated rather than uniform. These are current-period levels, not trend.

Embassy Suites by Hilton Santo Domingo (1) and Hilton Santo Domingo (1) also appear often — displacement is spread across multiple local options. El Embajador, a Royal Hideaway Hotel	1
Embassy Suites by Hilton Santo Domingo	1
Hilton Santo Domingo	1
Renaissance Santo Domingo Jaragua Hotel & Casino	1

Independent Positioning Context

> Independent Positioning looks stronger (#1 of 4; Portfolio AI Presence 87.5%) than Core AI Consideration (64.0%). Treat peer-set standing as relative context — it does not automatically imply stronger market-wide inclusion.

Reality Coverage Context

> Only 9 of 22 monitored attributes are consistently recognized (40.9% Reality Coverage). Not every gap deserves equal urgency. Validate first: On-Site Restaurant; In-Room Dining; Digital Key.
