Platform Executive Summary

BIGGEST STRENGTH

Often placed near the top when AI ranks hotels

Among AI answers where hotel ranking could be measured, Spice Island Beach Resort appeared in the Top 3 77.8% of the time. This shows how prominently the hotel is positioned when AI includes it.

BIGGEST CONSTRAINT

Not appearing consistently in AI answers

The hotel appeared in at least one AI answer for 97.8% of the traveler needs we tested, but across all individual AI answers it appeared 67.2% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

CHANGE SINCE LAST COMPARABLE RUN

No comparable prior official period yet

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.

Executive Conclusion

Spice Island Beach Resort's priority is a Reality Gap in how a distinctive part of the proposition is represented in AI answers.

What the Data Is Telling Us

Scenario Presence at 95.7% shows broad recognition across monitored traveler needs. AI Consideration at 57.6% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Leisure Travel; Leisure Travel, Business Travel, and Group / Meeting remain stronger. When the hotel is absent, Mount Cinnamon Resort & Beach Club most often appears (1 scenarios).

Why It Matters

If distinctive property attributes are weakly represented, the hotel can look broadly visible while still losing the moments where its real proposition should matter. This is a representation problem first, not automatically a peer-competition program.

Where the Pattern Is Concentrated

Leisure Travel is the softest Scenario Capture at 85.7%, while Leisure Travel, Business Travel, and Group / Meeting show broader coverage. The inclusion issue is concentrated, not universal. Mount Cinnamon Resort & Beach Club appears most often when the hotel is missing (1 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 30.4% (7 of 23 attributes). Start with gaps that matter operationally — beginning with Swim-Out Suites.

What Management Should Focus On Now

Focus first on Outdoor Event Space. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change. Independent Positioning (#1 of 6; Portfolio AI Presence 71.4%) measures relative standing among loyalty peers. Strong peer rank does not mean consistent inclusion across the wider demand set.

What to Review Next

Open Reality Gap evidence for Outdoor Event Space and compare recognition cues with official property pages and high-authority travel sources. Then check a small set of related demand scenarios for whether the attribute appears when competitors are named.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

> Leisure Travel is the clearest softness at 85.7% Scenario Capture. Leisure Travel, Business Travel, and Group / Meeting show broader coverage — the inclusion issue is concentrated rather than universal. These are current-period levels, not trend.

DEMAND TERRITORY	SCENARIO CAPTURE	CAPTURED	CAPTURE LEVEL	INTERPRETATION
Leisure Travel	85.7%	6 of 7	Partial Capture	Partial scenario capture. Review whether missing scenarios share a common attribute or competitor pattern.
Business Travel	100.0%	7 of 7	High Capture	High scenario-capture rate for this traveler need in the current period.
Couples / Romantic	100.0%	6 of 6	High Capture	High scenario-capture rate for this traveler need in the current period.
Group / Meeting	100.0%	10 of 10	High Capture	High scenario-capture rate for this traveler need in the current period.
Celebration	100.0%	5 of 5	High Capture	High scenario-capture rate for this traveler need in the current period.
Family	100.0%	5 of 5	High Capture	High scenario-capture rate for this traveler need in the current period.

Metric = demandCapture.byIntent scenario capture (captured/total). Prior-run territory rates are not published as a comparable series in this edition.

Competitive Movement

Competitive context: 4 Core competitors identified · Competitor-present displacement 12/45 scenarios

> 4 Core competitors identified in the certified competitive set for this period. Competitors appeared in 12 of 45 monitored scenarios when measuring competitor-present displacement (observational co-appearance / absence patterns — not causation). Mount Cinnamon Resort & Beach Club is the most frequent alternative when Spice Island Beach Resort is absent (1 scenarios). Counts show co-appearance patterns; they do not prove why displacement happens.

COMPETITOR	DISPLACEMENT COUNT
Mount Cinnamon Resort & Beach Club	1

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.

Independent Positioning Context

> Independent Positioning looks stronger (#1 of 6; Portfolio AI Presence 71.4%) than Core AI Consideration (57.6%). Treat peer-set standing as relative context — it does not automatically imply stronger market-wide inclusion.

Reality Coverage Context

> Only 7 of 23 monitored attributes are consistently recognized (30.4% Reality Coverage). Not every gap deserves equal urgency. Actionable now: Swim-Out Suites; Airport-Adjacent Location; Family-Friendly. Directly overlaps family-oriented representation — closing this supports inclusion in the softest traveler-need context. Validate first: On-Site Restaurant; Island Resort; Soft Brand / Independence; Wedding Venue; Outdoor Pool; Tennis Courts; Kayaking; Honeymoon Destination. Monitor: Outdoor Event Space.
