Platform Executive Summary

BIGGEST STRENGTH

Often placed near the top when AI ranks hotels

Among AI answers where hotel ranking could be measured, The St. Regis Mexico City appeared in the Top 3 75.6% of the time. This shows how prominently the hotel is positioned when AI includes it.

BIGGEST CONSTRAINT

Not appearing consistently in AI answers

The hotel appeared in at least one AI answer for 91.7% of the traveler needs we tested, but across all individual AI answers it appeared 71.9% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

CHANGE SINCE LAST COMPARABLE RUN

No comparable prior official period yet

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.

Executive Conclusion

The St. Regis Mexico City's priority is a Reality Gap in how a distinctive part of the proposition is represented in AI answers.

What the Data Is Telling Us

Large Ballroom / Event Capacity is recognized in only 0% of monitored answers. That is low enough to matter commercially if the attribute is part of how the hotel should win relevant traveler needs. Four Seasons Hotel Mexico City also appears in related absent scenarios, which can compound the representation miss. Broader Scenario Presence (91.7%) and Consideration (71.9%) do not, by themselves, prove the distinctive attribute is traveling into answers. Softest coverage today is Family Travel at 60.0% Scenario Capture. When absent, Four Seasons Hotel Mexico City appears most often (3 scenarios).

Why It Matters

If distinctive property attributes are weakly represented, the hotel can look broadly visible while still losing the moments where its real proposition should matter. This is a representation problem first, not automatically a peer-competition program.

Where the Pattern Is Concentrated

Family Travel is the softest Scenario Capture at 60.0%, while Business Travel and Group / Meeting show broader coverage. Focus where the gap is concentrated rather than treating every territory equally. Four Seasons Hotel Mexico City appears most often when the hotel is missing (3 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 31.8% (7 of 22 attributes). Start with gaps that matter operationally — beginning with Large Ballroom / Event Capacity.

What Management Should Focus On Now

Focus first on Large Ballroom / Event Capacity. Verify first-party and major travel-source completeness for that attribute before treating the issue as a peer-competition problem. Confirm the attribute is stated clearly where AI systems are most likely to read it.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change. Independent Positioning (#2 of 6; Portfolio AI Presence 69.6%) is peer-set context — keep it separate from Core demand metrics.

What to Review Next

Open Reality Gap evidence for Large Ballroom / Event Capacity and compare recognition cues with official property pages and high-authority travel sources. Then check a small set of related demand scenarios for whether the attribute appears when competitors are named.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.

Demand Movement

> Family Travel is the clearest softness at 60.0% Scenario Capture. Business Travel and Group / Meeting show broader coverage — softness is concentrated rather than uniform. These are current-period levels, not trend.

Competitive Movement

Competitive context: 9 Core competitors identified · Competitor-present displacement 31/48 scenarios

> 9 Core competitors identified in the certified competitive set for this period. Competitors appeared in 31 of 48 monitored scenarios when measuring competitor-present displacement (observational co-appearance / absence patterns — not causation). Four Seasons Hotel Mexico City is the most frequent alternative when The St. Regis Mexico City is absent (3 scenarios). JW Marriott Hotel Mexico City (3) and InterContinental Presidente Mexico City (2) also appear often — displacement is spread across multiple local options. Counts show co-appearance patterns; they do not prove why displacement happens.

COMPETITOR	DISPLACEMENT COUNT
Four Seasons Hotel Mexico City	3
JW Marriott Hotel Mexico City	3
InterContinental Presidente Mexico City	2
Las Alcobas, a Luxury Collection Hotel, Mexico City	1

Competitive movement describes co-appearance and absence patterns in monitored answers. It does not establish causation.

Independent Positioning Context

> Independent Positioning rank #2 of 6 and Portfolio AI Presence 69.6% reinforce a relatively strong Core consideration reading. Peer-set leadership is consistent with broader inclusion this period.

Reality Coverage Context

> Only 7 of 22 monitored attributes are consistently recognized (31.8% Reality Coverage). Not every gap deserves equal urgency. Actionable now: Large Ballroom / Event Capacity; Family-Friendly. Location identity is foundational for traveler recognition and often overlaps weaker local-demand scenarios. Validate first: On-Site Restaurant; Private Dining; In-Room Dining; Digital Key.
