Platform Executive Summary

BIGGEST STRENGTH

Often placed near the top when AI ranks hotels

Among AI answers where hotel ranking could be measured, YOTEL Geneva Lake appeared in the Top 3 85.7% of the time. This shows how prominently the hotel is positioned when AI includes it.

BIGGEST CONSTRAINT

Not appearing consistently in AI answers

The hotel appeared in at least one AI answer for 87% of the traveler needs we tested, but across all individual AI answers it appeared 21.7% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

CHANGE SINCE LAST COMPARABLE RUN

No comparable prior official period yet

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.

Executive Conclusion

YOTEL Geneva Lake's primary issue is entering AI consideration at all, especially for Leisure Travel.

What the Data Is Telling Us

Scenario Presence at 97.5% shows broad recognition across monitored traveler needs. AI Consideration at 24.4% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Leisure Travel; Business Travel and Group / Meeting remain stronger. When the hotel is absent, Royal Savoy Hotel & Spa Lausanne most often appears (5 scenarios).

Why It Matters

Fine-tuning rank against individual competitors will have limited value until the hotel becomes relevant in more of the traveler needs it currently misses. Entry problems and rank problems require different management attention. If leadership optimizes competitor comparisons first, the hotel can look busy while still missing the larger answer-set gap.

Where the Pattern Is Concentrated

Leisure Travel is the softest Scenario Capture at 71.4%, while Business Travel and Group / Meeting show broader coverage. The inclusion issue is concentrated, not universal. Royal Savoy Hotel & Spa Lausanne appears most often when the hotel is missing (5 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 12.5% (2 of 16 attributes). Start with gaps that matter operationally — beginning with Airport-Adjacent Location.

What Management Should Focus On Now

Focus first on how the hotel is represented for Leisure Travel. Review whether the attributes, positioning, and use cases most relevant to those travelers are complete and consistently represented across priority sources. Treat competitor-rank tactics as secondary until entry improves.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change.

What to Review Next

Compare evidence from scenarios where Royal Savoy Hotel & Spa Lausanne appears with the property information currently available for YOTEL Geneva Lake. Check entry cues first — product type, occasion, and location framing — before broadening the review to secondary attributes.

2. Demand & Competitive Movement
