AI VISIBILITY AUDIT & ACTION PLAN

Castillo Hotel Son Vida, a Luxury Collection Hotel, Mallorca

Palma de Mallorca, Spain

INITIAL DIGITAL PRESENCE ASSESSMENT

NOVEMBER 2026

1. Executive Audit Summary

Protect a Strong Luxury Position With One Coherent, Accurate Story

Castillo Hotel Son Vida records 50.0% consideration and 62.1% scenario presence, ranking first among four Bonvoy peers. The measured position is credible but not universal. Management's highest-value work is to resolve the spa-size conflict and make the adults-only Luxury Collection castle, Arabella golf, wellness, events, and wedding offer read as one precise luxury proposition.

Performance Snapshot

AI CONSIDERATION	SCENARIO PRESENCE	CERTIFIED PEER POSITION
50.0%	**62.1%**	**#1 of 4**
Share of comparable monitored AI answers that mentioned the hotel	Eligible traveler-need scenarios where the hotel appeared	Highest presence among 4 certified Marriott Bonvoy peers

AI Consideration is the share of comparable monitored answers mentioning the hotel; Scenario Presence is the share of eligible traveler-need scenarios where it appeared; Certified Peer Position compares only the certified four-hotel set. Presence does not equal bookings, revenue, or traveler exposure.

Key Findings

1. The Spa Measurement Requires Hotel Confirmation

The same Marriott overview describes the spa as both 900 and 990 square metres, apparently referring to the same facility.

Why it matters. The conflict is verified, but the correct figure is not. Spa operations must confirm scope and measurement before Marriott corrects the page; the audit should not invent a winner.

2. Distinctive Luxury Attributes Need One Narrative

Official content combines an adults-only Luxury Collection castle, Arabella golf access, wellness, meetings, and weddings.

Why it matters. A signed fact architecture can connect these strengths while distinguishing on-property, affiliated, seasonal, and policy-dependent elements—giving leisure guests and international planners a coherent luxury offer without overstating access or ownership.

3. Narrow Signals Deserve Proportionate Review

A Marriott access probe returned an Akamai 403 pattern, and Hotel Saratoga displaced Castillo in only three monitored scenarios.

Why it matters. Neither observation establishes a broad weakness. Platform support should investigate access, while commercial leadership can review the three scenarios lightly and close them if they are not strategically relevant.

Recommended Priorities

PRIORITY	ACTION	DESIRED OUTCOME
High	Spa operations and Marriott content: reconcile 900 versus 990 m^2	One approved spa specification
High	Commercial team: align castle, adults-only, golf, wellness, and events facts	Coherent luxury proposition
Medium	Marriott platform support: investigate bounded access behavior	Documented crawler-access decision
Medium	Commercial team: review only three Saratoga scenarios	Proportionate content decision

EXECUTIVE TAKEAWAY

Castillo Hotel Son Vida can strengthen a credible measured position through precision, not volume: resolve the 900/990 m² spa discrepancy, connect the adults-only castle, golf, wellness, and events offer, and keep the three Hotel Saratoga scenarios in proportion.

6. Methodology, Responsibilities & Next Steps

Combines the certified ADP baseline with a bounded review of named public pages and zero-cost technical probes. No paid research, Airtable write, ADP remeasurement, or customer publication was performed.

How to Read Findings

- VERIFIED_ISSUE — a directly observed, source-backed discrepancy.
- RECOMMENDED_INVESTIGATION — evidence warrants review but does not prove a defect or cause.
- REQUIRES_HOTEL_CONFIRMATION — hotel leadership must establish the source of truth before correction.
- OPTIONAL_COMMERCIAL_OPPORTUNITY — proceed only if leadership wants the demand.

Responsibilities

- Hotel leadership confirms facts, priorities, and public changes.
- Digital or brand teams implement only approved corrections and document verification.
- Dealality packages measurement context and evidence without implying booking or revenue causation.

How This Relates to Monthly Monitoring

Approved actions may be tracked in a later review. Completing an action does not itself prove a change in AI presence, bookings, or revenue.

Suggested Next Step

Confirm the decision items, then authorize the highest-priority validated work.
