Platform Executive Summary

BIGGEST STRENGTH

Still developing

W Rome does not yet show a single dominant strength with enough comparable evidence in this period.

BIGGEST CONSTRAINT

Not appearing consistently in AI answers

The hotel appeared in at least one AI answer for 60% of the traveler needs we tested, but across all individual AI answers it appeared 26.3% of the time. In practical terms, AI recognizes the hotel as relevant for many types of trips, but a traveler will not consistently see it among the hotel options surfaced.

CHANGE SINCE LAST COMPARABLE RUN

No comparable prior official period yet

No comparable prior official monitoring period is available yet. This period can be evaluated on its own; change over time is not shown.

Executive Conclusion

W Rome reaches many monitored demand scenarios, but consideration consistency is the primary constraint.

What the Data Is Telling Us

Scenario Presence at 60.0% shows broad recognition across monitored traveler needs. AI Consideration at 26.3% shows that recognition does not consistently convert into selection in individual answers. The management problem is inclusion consistency — not awareness. Softness concentrates in Family Travel. When the hotel is absent, Hotel de Russie, a Rocco Forte Hotel most often appears (6 scenarios).

Why It Matters

Broad scenario reach without consistent appearance in AI answers means the hotel is known in the demand set but not reliably carried into traveler-facing answers. Management attention should start with consistency of representation, not with assuming the hotel needs an entirely new competitive set.

Where the Pattern Is Concentrated

Family Travel is the softest Scenario Capture at 0.0%. The inclusion issue is concentrated, not universal. Hotel de Russie, a Rocco Forte Hotel appears most often when the hotel is missing (6 scenarios) — use that pattern for source and fact checks, not as proof of cause. Reality Coverage is 57.1% (4 of 7 attributes). Start with gaps that matter operationally — beginning with Full-Service Hotel.

What Management Should Focus On Now

Focus first on consistency of representation for Adventure & Experiences. Confirm priority sources present the same use cases and attributes that appear in scenarios where the hotel is absent, and close gaps that repeatedly coincide with cases where the hotel is missing.

What Not to Overreact To

No comparable prior official period is available — read these as current levels, not period-over-period change.

What to Review Next

Compare high-presence versus low-consideration scenarios and inspect which sources and attributes appear when the hotel is missing. Use that evidence pack before changing channel strategy.

2. Demand & Competitive Movement

Material Movement

No material movement rows in this period.
