AI VISIBILITY & DIGITAL PRESENCE ASSESSMENT

Castillo Hotel Son Vida, a Luxury Collection Hotel, Mallorca

Palma de Mallorca, Spain

AUDIT & ACTION PLAN

NOVEMBER 2026

1. Executive Audit Summary

Protect a Strong Luxury Position With One Coherent, Accurate Story

Castillo Hotel Son Vida records 50.0% consideration and 62.1% scenario presence, ranking first among four Bonvoy peers. The measured position is credible but not universal. Management's highest-value work is to resolve the spa-size conflict and make the adults-only Luxury Collection castle, Arabella golf, wellness, events, and wedding offer read as one precise luxury proposition.

Performance Snapshot

AI CONSIDERATION	SCENARIO PRESENCE	CERTIFIED PEER POSITION
50.0%	**62.1%**	**#1 of 4**
Share of comparable monitored AI answers that mentioned the hotel	Eligible traveler-need scenarios where the hotel appeared	Highest presence among 4 certified Marriott Bonvoy peers

AI Consideration is the share of comparable monitored answers mentioning the hotel; Scenario Presence is the share of eligible traveler-need scenarios where it appeared; Certified Peer Position compares only the certified four-hotel set. Presence does not equal bookings, revenue, or traveler exposure.

Key Findings

1. The Spa Measurement Requires Hotel Confirmation

The same Marriott overview describes the spa as both 900 and 990 square metres, apparently referring to the same facility.

Why it matters. The conflict is verified, but the correct figure is not. Spa operations must confirm scope and measurement before Marriott corrects the page; the audit should not invent a winner.

2. Distinctive Luxury Attributes Need One Narrative

Official content combines an adults-only Luxury Collection castle, Arabella golf access, wellness, meetings, and weddings.

Why it matters. A signed fact architecture can connect these strengths while distinguishing on-property, affiliated, seasonal, and policy-dependent elements—giving leisure guests and international planners a coherent luxury offer without overstating access or ownership.

3. Narrow Signals Deserve Proportionate Review

A Marriott access probe returned an Akamai 403 pattern, and Hotel Saratoga displaced Castillo in only three monitored scenarios.

Why it matters. Neither observation establishes a broad weakness. Platform support should investigate access, while commercial leadership can review the three scenarios lightly and close them if they are not strategically relevant.

Recommended Priorities

PRIORITY	ACTION	DESIRED OUTCOME
HIGH	Reconcile and Correct Spa Size Information	One confirmed spa measurement published consistently on official brand and hotel pages.
MEDIUM	Align Castle, Adults-Only, Golf, Wellness, and Events Facts	Approved "Align Castle, Adults-Only, Golf, Wellness, and Events Facts" facts published and spot-checked on Official Marriott property overview.
MEDIUM	Investigate Marriott Property-Page Access for Intended Crawlers	Documented crawler-access decision with verified live robots/CDN behavior.
MEDIUM	Review the Three Hotel Saratoga Displacement Scenarios	Published changes match approved facts and contain no unsupported comparative claim.
MEDIUM	Protect Visit Palma Backlink Asset with Accurate Luxury Facts	Verified CVB or partner listing fields corrected with the approved property URL and a working official hyperlink, or documented decline retained.

EXECUTIVE TAKEAWAY

Castillo Hotel Son Vida can strengthen a credible measured position through precision, not volume: resolve the 900/990 m² spa discrepancy, connect the adults-only castle, golf, wellness, and events offer, and keep the three Hotel Saratoga scenarios in proportion. Digital authority: Visit Palma destination inventories already list Castillo Hotel Son Vida alongside Sheraton Mallorca Arabella Golf—strong destination authority for luxury and meetings demand. Digital content readiness: Castillo's Marriott Luxury Collection brand page and Visit Palma destination listing already provide strong discovery surfaces.

5. Digital Authority & External Visibility

Partial public review of third-party websites — not a comprehensive paid backlink inventory, and not a measure of AI ranking.

WHAT THIS MEANS COMMERCIALLY

Trusted third-party websites currently link to this hotel's official pages (6 verified website links in this review). 3 additional third-party pages mention the hotel without a clear property link. Strengthening destination and industry links can improve discoverability — it does not, by itself, change measured AI visibility.

External visibility snapshot

Metric	In this report	What it means
Verified website links	**6**	Third-party pages that hyperlink to an official hotel or brand property URL
Unique referring websites	**5**	Distinct domains among verified links (deduped hosts)
Third-party references (no link)	**3**	Pages that name the hotel but do not clearly link to the official site
High-value destination / industry sources	**6**	Verified links from tourism, CVB, destination, or specialist hosts in this review
Competitor link examples	**1**	Evidence that peers appear on useful third-party pages (not a full backlink ranking)

This is a **partial public review**, not a paid backlink index. Verified website links (backlinks) are different from mentions without hyperlinks, and both are different from measured AI citations in ADP. Counts below are the verified findings shown to you — not a claim about AI ranking or search volume.

Highest-value external opportunities

Recommended authority actions

1. **Request official property URL on Castillo Hotel Son Vida, Mallorca | Elegant Golf Resorts** · Hotel Sales & Marketing · HIGH priority
   Public research verified 5 property-specific third-party hyperlink(s) and 8 external reference(s) without inventing paid-provider inventory.

Website links and third-party mentions are different from measured AI visibility. Improving a destination listing does not guarantee a change in AI recommendations, bookings, or revenue.

6. Digital Platform & Website Readiness

> **EXECUTIVE ASSESSMENT**
>
> Castillo's Marriott Luxury Collection brand page and Visit Palma destination listing already provide strong discovery surfaces. The highest content-readiness risk is spa measurement consistency (900 vs 990 m²) requiring hotel confirmation before wider reuse.

Digital presence: brand property page identified. Brand and hotel-operated sources are assessed independently when both exist. Measured ADP traveler-intent detail is not repeated here.

Digital discoverability readiness

Dimension	Status
Website accessibility	BRAND PAGE REACHABLE WITH KNOWN BOT LIMITS
Content completeness	STRONG WITH SPA CONFIRMATION GAP
Structured information	limited public review
Traveler question coverage	STRONG LUXURY GOLF WELLNESS

Traveler question gaps

- **Which Palma luxury hotels have a substantial spa?**
  900 vs 990 m^2 conflict requires hotel confirmation
  Action. Approve one spa specification; update Marriott and Visit Palma profiles
- **Which Mallorca luxury hotels offer golf access?**
  Keep Arabella golf relationship language accurate; do not overstate ownership
  Action. Approve golf access wording for brand and Golfbreaks

9. Methodology, Responsibilities & Next Steps

Combines the Dealality's latest AI visibility measurements with a bounded review of named public pages and standard technical checks. No paid research, system record update, new AI visibility measurement, or customer publication was performed.

How to Read Findings

- Verified Problem — a directly observed, source-backed discrepancy.
- Needs Investigation — evidence warrants review but does not prove a defect or cause.

- Hotel confirmation needed — hotel leadership must establish the source of truth before correction.
- Optional Opportunity — proceed only if leadership wants the demand.

Responsibilities

- Hotel leadership confirms facts, priorities, and public changes.
- Digital or brand teams implement only approved corrections and document verification.
- Dealality packages measurement context and evidence without implying booking or revenue causation.

How This Relates to Monthly Monitoring

Approved actions may be tracked in a later review. Completing an action does not itself prove a change in AI presence, bookings, or revenue.

Suggested Next Step
