

REDUCE FRICTION. IMPROVE DEAL FLOW. SMARTER DECISIONS.

REDUCING FRICTION IN HOW OWNERS, BRANDS, AND OPERATORS
CONNECT, ASSESS FIT, AND ADVANCE OPPORTUNITIES.

The Problem

Hospitality dealmaking is still **too fragmented, manual, and too time-consuming**. Too often, opportunities are still surfaced through:

- **scattered outreach**
- **inconsistent materials**
- **disconnected follow-up**
- **limited comparability across options**
- **too much manual coordination before real alignment is established**

For owners, brands, and operators, that often means **too much noise, slower evaluation**, and too much time spent figuring out which conversations are actually worth pursuing.

The Solution

Dealality is being built to bring **more structure, clarity, and efficiency** to early opportunity evaluation. The platform is designed to help the right parties:

- **connect earlier**
- **assess fit more clearly**
- **compare options more efficiently**
- **organize outreach and follow-up more effectively**
- **advance stronger opportunities with less friction**

Core Platform Functionality

- Structured Deal Intake and Setup
- Matching and Comparison Tools
- Organized Outreach and Deal Progression Workflow
- Brand, Operator, and Opportunity Insight Tools
- Analytics and Decision-Support Tools

Why it Matters

For Owners and Developers

- earlier visibility into relevant brands and operators
- a more organized evaluation of project fit
- less wasted time on fragmented outreach and low-quality conversations
- clearer side-by-side comparison of options

For Brand Development Teams

- earlier access to more relevant opportunities
- more structured engagement with owners
- less noise from inconsistent or incomplete deal information
- better prioritization of the right conversations to advance

For Operators / Management Companies

- earlier visibility into relevant opportunities
- more structured participation earlier in the process
- more efficient engagement in early-stage opportunity discussions
- a more organized pathway into active deal conversations

What We Are Hearing

Themes that continue to resonate in discussions

- The process is still too manual
- Early evaluation is slowed by fragmented outreach
- Owners want clearer ways to assess fit
- Brands and operators want better visibility into relevant opportunities

Where We Are Now

- Dealality is **currently being refined with feedback from a select group of industry participants** as we prepare for broader rollout.
- **The goal is simple:** Help owners, brands, and operators spend less time sorting through noise and more time advancing the right opportunities.
